## [Citizens Coalition Los Angeles v. City of Los Angeles](#)

Court of Appeal of California, Second Appellate District, Division Two

August 23, 2018, Opinion Filed

B283480, B283486

### Reporter

26 Cal. App. 5th 561 \*; 237 Cal. Rptr. 3d 313 \*\*; 2018 Cal. App. LEXIS 753 \*\*\*; 2018 WL 4026019

CITIZENS COALITION LOS ANGELES et al., Plaintiffs and Respondents, v. CITY OF LOS ANGELES et al., Defendants and Appellants; TARGET CORPORATION, Real Party in Interest and Appellant.LA MIRADA AVENUE NEIGHBORHOOD ASSOCIATION OF HOLLYWOOD, Plaintiff and Respondent, v. CITY OF LOS ANGELES et al., Defendants and Appellants; TARGET CORPORATION, Real Party in Interest and Appellant.

**Notice:** As modified Sept. 13, 2018.

**Subsequent History:** Modified and rehearing denied by [Citizens Coalition L.A. v. City of L.A., 2018 Cal. App. LEXIS 818 \(Cal. App. 2d Dist., Sept. 13, 2018\)](#)

**Prior History:** [\*\*\*1] APPEAL from a judgment of the Superior Court of Los Angeles County, Nos. BS162678 and BS162710, Richard L. Fruin, Jr., Judge.

[La Mirada Avenue Neighborhood Assn. of Hollywood v. City of Los Angeles, 2 Cal. App. 5th 586, 206 Cal. Rptr. 3d 343, 2016 Cal. App. LEXIS 687 \(Aug. 16, 2016\)](#)

**Disposition:** Reversed.

### Core Terms

---

Ordinance, Subarea, Superstore, environmental impact report, spot zoning, reasonably foreseeable, city council, requirements, parcels, Addendum,

projects, City's, zoning, specific plan, general plan, agency's, trial court, retail, major revision, exempt, Heights, prepare, subzone, negative declaration, circumstances, applies, build, substantial evidence, public interest, assess

### Case Summary

---

#### Overview

**HOLDINGS:** [1]-An ordinance that amended a specific plan to create a new subzone for large commercial development and rezoned a store under construction into that subzone was not a new project under [Pub. Resources Code, § 21065](#), and did not require a subsequent or supplemental environmental impact report under [Pub. Resources Code, § 21166](#), because substantial evidence supported the city council's finding that the sole reasonably foreseeable consequence of creating the subzone was the store's construction, as to which environmental review had been completed; [2]-The ordinance did not result in impermissible spot zoning because it was unclear whether the new subzone was less restrictive, the city had a reasonable basis to find the ordinance was in the public interest and compatible with other plans, and amending the specific plan was permissible under [Gov. Code, §§ 65453, 65454, 66473.5](#).

#### Outcome

Judgment reversed.

### LexisNexis® Headnotes

---

Business & Corporate Compliance > ... > Real Property Law > Zoning > Spot Zoning

Environmental Law > Administrative Proceedings & Litigation > Judicial Review

Real Property Law > Zoning > Judicial Review

### [HNI](#) [↓] **Zoning, Spot Zoning**

In reviewing compliance with the California Environmental Quality Act, [Pub. Resources Code, § 21000 et seq.](#), an appellate court reviews the agency's action, not the trial court's decision. The same is true as to spot zoning.

Governments > Legislation > Interpretation

Governments > Local

Governments > Ordinances & Regulations

### [HN2](#) [↓] **Legislation, Interpretation**

In evaluating the meaning of an ordinance, like any other statute, a court looks first to the enactment's plain language. Courts interpret ordinances by the same rules applicable to statutes. Statutory analysis begins with the plain language of a statute, and if that language is unambiguous, the inquiry ends there as well.

Governments > Legislation > Interpretation

### [HN3](#) [↓] **Legislation, Interpretation**

Courts may not change the scope of a statute by reading into it language it does not contain or by reading out of it language it does.

Governments > Legislation > Interpretation

### [HN4](#) [↓] **Legislation, Interpretation**

A legislative body's rejection of a specific provision is evidence that the ultimately enacted law should not be construed to include the omitted provision.

Environmental Law > Natural Resources & Public Lands > National Environmental Policy Act

### [HN5](#) [↓] **Natural Resources & Public Lands, National Environmental Policy Act**

The California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), is designed to ensure that the long-term protection of the environment shall be the guiding criterion in public decisions. [CEQA](#) operates, not by dictating pro-environmental outcomes, but rather by mandating that decision makers and the public study the likely environmental effects of contemplated government actions and thus make fully informed decisions regarding those actions. In other words, [CEQA](#) does not care what decision is made as long as it is an informed one.

Environmental Law > Assessment & Information Access > Environmental Assessments

### [HN6](#) [↓] **Assessment & Information Access, Environmental Assessments**

When a state or local public agency is planning an activity for which there has been no prior California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), review, [CEQA](#) dictates a three-step process. [Cal. Code Regs., tit. 14, § 15002, subd. \(k\)](#). In the first step, the agency is to conduct a preliminary review to assess whether the contemplated action (1) qualifies as a project falling within [CEQA](#)'s ambit and, if it does, (2) whether the project nevertheless falls within one of [CEQA](#)'s threshold exemptions. [Cal. Code Regs.,](#)

[tit. 14, § 15060](#). An action qualifies as a "project" if it is an activity which may cause either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, and is undertaken by the public agency itself or by private persons with the agency's support or approval. [Pub. Resources Code, § 21065](#); [Cal. Code Regs., tit. 14, § 15378, subd. \(a\)](#).

Business & Corporate  
Compliance > ... > Environmental Law > Land  
Use & Zoning > Comprehensive & General  
Plans

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

Business & Corporate Compliance > ... > Real  
Property Law > Zoning > Comprehensive Plans

### [HN7](#) [↓] **Land Use & Zoning, Comprehensive & General Plans**

A project within the California Environmental Quality Act, [Pub. Resources Code, § 21000 et seq.](#), includes the adoption and amendment of a city's or county's general plan (which is its comprehensive, long-term general plan for the physical development of the county or city) and its specific plans (which are plans for the systematic implementation of the general plan for all or part of the area covered by the general plan). [Cal. Code Regs., tit. 14, § 15378, subd. \(a\)\(1\)](#); [Gov. Code, §§ 65300, 65450](#).

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

### [HN8](#) [↓] **Assessment & Information Access, Environmental Assessments**

A project may be exempt from the California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), if it falls within any of the following types of threshold exemptions: (1) those defined by the Legislature in [CEQA](#) itself (so-called statutory exemptions) under [Pub. Resources Code, § 21080, subd. \(b\)](#), and Cal. Code Regs., tit. 14, §§ 15260-15282; (2) those the Legislature empowered the Secretary of the Natural Resources Agency to recognize as categorically exempt (so-called categorical exemptions) under [Pub. Resources Code, § 21084, subd. \(a\)](#), and Cal. Code Regs., tit. 14, §§ 15300-15333; or (3) the exemption for projects for which it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment (the so-called common sense exemption) under [Cal. Code Regs., tit. 14, § 15061, subd. \(b\)\(3\)](#). If the action is not a project, [CEQA](#) requires no further action; if the action is a project but is exempt, [CEQA](#) requires the filing of a notice of exemption. [Cal. Code Regs., tit. 14, § 15062](#).

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

### [HN9](#) [↓] **Assessment & Information Access, Environmental Assessments**

In the second step of a California Environmental Quality Act, [Pub. Resources Code, § 21000 et seq.](#), analysis, which is only reached for a nonexempt project, the agency is to conduct a more in-depth initial study to assess whether there is substantial evidence supporting a fair argument that the project may have significant adverse effects on the environment. [Pub. Resources Code, § 21082.2, subd. \(a\)](#); [Cal. Code Regs., tit. 14, § 15064, subd. \(f\)\(1\)](#). If the initial study reveals no such effect or an effect that can be avoided entirely or mitigated into insignificance, the agency may issue a negative declaration or a mitigated negative declaration, respectively, that so indicates. [Pub. Resources Code, § 21080, subd. \(c\)](#); [Cal. Code Regs., tit. 14,](#)

[§§ 15063, subd. \(b\)\(2\), 15070, 15071.](#)

Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

### [HN12](#) [↓] **Environmental & Natural Resources, Environmental Impact Statements**

When a state or local public agency is considering a project for which there has already been prior California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), review — whether that review has led to the preparation of an environmental impact report or instead to the issuance of a negative declaration (mitigated or not) — [Pub. Resources Code, § 21166](#), provides that the agency is not to prepare a subsequent or supplemental environmental impact report or negative declaration unless: (1) substantial changes are proposed in the project which will require major revisions of the environmental impact report or, if the prior review precipitated a negative declaration, the preparation of an environmental impact report; (2) substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report or, if the prior review precipitated a negative declaration, the preparation of such an environmental impact report; or (3) new information, which was not known and could not have been known at the time the environmental impact report was certified as complete, or the negative declaration was issued, becomes available.

Business & Corporate  
Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

### [HN13](#) [↓] **Environmental & Natural Resources, Environmental Impact Statements**

Unless one of the three exceptions in [Pub. Resources Code, § 21166](#), applies, an agency may not prepare a new or supplemental environmental

impact report. The agency must instead prepare an addendum to its prior California Environmental Quality Act, [Pub. Resources Code, § 21000 et seq.](#), analysis. [Cal. Code Regs., tit. 14, § 15164.](#)

Business & Corporate  
Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

Environmental Law > Administrative  
Proceedings & Litigation > Judicial Review

#### [HNI4](#) **Environmental & Natural Resources, Environmental Impact Statements**

Because the question whether an initial environmental document remains relevant despite changed plans or circumstances — like the question whether an initial environmental document requires major revisions due to changed plans or circumstances — is a predominantly factual question, it is a question for the agency to answer in the first instance, drawing on its particular expertise. Judicial review is accordingly confined to assessing whether the agency's determination is supported by substantial evidence. This more deferential review standard means that courts give greater deference to a public agency's determination whether further California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), review is required than they do to whether initial [CEQA](#) review is required. This differential treatment represents a shift in the applicable policy considerations: Because, by this point in time, in-depth review has already occurred, the interests of finality are weightier, and the statutory presumption flips in favor of the developer and against further review. The question is no longer whether to conduct the environmental review process in the first place, but

rather whether circumstances have changed enough to justify repeating a substantial portion of that process.

Business & Corporate  
Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

#### [HNI5](#) **Environmental & Natural Resources, Environmental Impact Statements**

The answer to the question of whether a project has had prior environmental review or is an entirely new project does not turn on any abstract characterization of the project as "new" or "old." Instead, it turns on whether the previous environmental document retains any relevance in light of the proposed changes. A prior environmental document will in most cases remain relevant when the prior California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), analysis and the current [CEQA](#) analysis pertain to related projects at the same level of generality — that is, when both deal with a specific development or both deal with a more generalized program (such as a general plan or a specific plan). But what if the related projects operate at different levels of generality? What if the prior [CEQA](#) analysis pertained to a specific development while the current project deals with a more generalized program? Or vice versa? Does this difference render [Pub. Resources Code, § 21166](#), inapplicable? The answer is "no."

Business & Corporate  
Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

**[HN16](#) [↓] Environmental & Natural Resources,  
Environmental Impact Statements**

The primary consideration as to whether [Pub. Resources Code, § 21166](#), applies is whether the previous environmental document retains any relevance in light of the proposed changes. That consideration looks to the continued relevance of the information provided by the prior California Environmental Quality Act, [Pub. Resources Code, § 21000 et seq.](#), analysis, not the type of project for which it was generated. Courts have more generally declined to attach too much significance to the semantic label a project bears. Placing definitive weight on the label can lead to an absurd result.

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

**[HN20](#) [↓] Environmental & Natural Resources,  
Environmental Impact Statements**

[Pub. Resources Code, § 21166](#), provides that, where an agency has engaged in a prior California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), review that retains relevance to the project currently under consideration, the agency must file an addendum (either to a prior environmental impact report or

prior negative declaration) unless (1) there have been substantial changes in either the project or the circumstances under which the project is being undertaken, which will require major revisions of the prior environmental impact report or negative declaration, or (2) there is new information that was not known and could not have been known at the time of the prior CEQA review. If these conditions exist, the agency must prepare a subsequent or supplemental report. CEQA itself provides no further guidance on what these standards mean, but the Guidelines for the Implementation of the California Environmental Quality Act, Cal. Code Regs., tit. 14, § 15000 et seq., do. Major revisions to a CEQA review document will be required, and new information will warrant a new document, when the project currently under consideration involves new significant environmental effects or a substantial increase in the severity of previously identified significant effects or the new information shows the same. Cal. Code Regs., tit. 14. § 15162, subd. (a).

Business & Corporate

### [HN21](#) [↓] **Environmental & Natural Resources, Environmental Impact Statements**

An inquiry under Cal. Code Regs., tit. 14, § 15162, subd. (a), into whether a prior California Environmental Quality Act (CEQA), Pub. Resources Code, § 21000 et seq., review of a project is sufficient in scope vis-à-vis subsequent changes to that project is functionally indistinguishable from the question whether a current CEQA review of a project is sufficient in scope vis-à-vis possible future actions flowing from that project. In both instances, the fundamental

question is the same: Does the existing CEQA document encapsulate all of the environmentally significant impacts of the project? In the latter instance, further CEQA analysis is required only (1) if the future expansion or other action is a reasonably foreseeable consequence of the initial project, and (2) if that future expansion or action will be significant in that it will likely change the scope or nature of the initial project or its environmental effects. The same test should be applied in both instances, including under Pub. Resources Code, § 21166.

Business & Corporate

Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

### [HN22](#) [↓] **Environmental & Natural Resources, Environmental Impact Statements**

An inquiry into whether a consequence of a project is reasonably foreseeable, and thus requires further California Environmental Quality Act (CEQA), Pub. Resources Code, § 21000 et seq., review, depends on how broadly CEQA construes the concept of reasonable foreseeability. On the one hand, construing reasonable foreseeability too narrowly means that a consequence may not be evaluated until it is too late. This is problematic because the failure to consider a consequence (1) can violate CEQA's mandate that agencies consider the cumulative and total effect of a project rather than chopping a large project into many little ones, each with a minimal potential impact on the environment; (2) risks that the agency will not consider that consequence until after the project has been approved, at which point the steamroller effect of development makes it nearly impossible to deflect the momentum for that project; and (3) risks that the agency will have already otherwise made

up its mind, rendering any study of the consequence little more than a burdensome reconsideration of decisions already made or a post hoc rationalization to support action already taken. On the other hand, construing reasonable foreseeability too broadly means that a consequence may be evaluated too early.

Business & Corporate  
Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

### [HN23](#) [↓] **Environmental & Natural Resources, Environmental Impact Statements**

Courts have deemed a consequence of a project under the California Environmental Quality Act, [Pub. Resources Code, § 21000 et seq.](#), to be reasonably foreseeable only when that consequence is, as a practical matter, sufficiently certain to happen. The degree of certainty has been found to be sufficient in five different situations. First, a consequence is reasonably foreseeable when the agency has already committed itself to undertake the consequence. [Cal. Code Regs., tit. 14, § 15165](#). Second, a consequence is reasonably foreseeable when the project under review presupposes the occurrence of that consequence—that is, when the consequence is a necessary and essential component of the project itself. Third, a consequence is reasonably foreseeable when it is itself under environmental review. Fourth, a consequence is reasonably foreseeable when the agency subjectively intends or anticipates the consequence, and the project under review is meant to be the first step toward that consequence. Lastly, a consequence is reasonably foreseeable if the project under review creates an incentive that is all but certain to result in the consequence.

Business & Corporate  
Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

### [HN24](#) [↓] **Environmental & Natural Resources, Environmental Impact Statements**

If a consequence falls into any of the categories that the case law has found to be reasonably foreseeable and is sufficiently certain to come to pass that it warrants evaluation under the California Environmental Quality Act ([CEQA](#)), [Pub. Resources Code, § 21000 et seq.](#), it does not matter that the consequence might be subject to later [CEQA](#) review when its contours become more concrete. Nor does it matter that the consequence's contours are hazy and thus its impact cannot be gauged with exactitude. [Cal. Code Regs., tit. 14, § 15151](#), provides that agencies should proceed in the light of what is reasonably feasible information.

Business & Corporate  
Compliance > ... > Environmental  
Law > Assessment & Information  
Access > Environmental Impact Statements

Environmental Law > Assessment &  
Information Access > Environmental  
Assessments

### [HN25](#) [↓] **Environmental & Natural Resources, Environmental Impact Statements**

A consequence is not reasonably foreseeable when it is entirely independent of the project under consideration. A consequence is not reasonably foreseeable simply because the project under consideration makes that consequence a possibility—even when the public agency is subjectively aware of that possibility (that is, even when it is a gleam in the planner's eye). And, a

consequence is not reasonably foreseeable merely because the project creates an incentive for that consequence to come to pass (unless that incentive makes the consequence all but certain). In these situations, the California Environmental Quality Act, *Pub. Resources Code, § 21000 et seq.*, does not exempt the consequence from environmental review; it merely postpones that review until the consequence is sufficiently certain.

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

Environmental Law > Administrative Proceedings & Litigation > Judicial Review

### [HN26](#) [↓] **Standards of Review, Substantial Evidence**

Substantial evidence is defined as evidence—that is, as the facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts—presented in the record. *Pub. Resources Code, § 21082.2, subd. (c)*. Substantial evidence does not include argument, speculation, unsubstantiated opinion or narrative. In assessing whether substantial evidence supports an agency's finding, a reviewing court must indulge all reasonable inferences from the evidence that would support the agency's finding as well as resolve all conflicts in the evidence and all reasonable doubts in favor of that finding.

Business & Corporate Compliance > ... > Environmental Law > Land Use & Zoning > Comprehensive & General Plans

Business & Corporate Compliance > ... > Real Property Law > Zoning > Spot Zoning

Business & Corporate Compliance > ... > Real Property Law > Zoning > Comprehensive Plans

### [HN27](#) [↓] **Land Use & Zoning, Comprehensive & General Plans**

Spot zoning occurs when a parcel of land is rezoned to give it fewer or greater rights than the parcels surrounding it. Although spot zoning traditionally refers to the creation of islands with more restrictive zoning, it can also refer to the creation of islands with less restrictive zoning. Because local bodies enjoy broad legislative discretion when it comes to zoning, however, spot zoning is not necessarily invalid. The burden is on the party challenging the spot zoning to show that the spot zoning was invalid and hence an abuse of that discretion. The creation of a spot zone is invalid only when it is not in the public interest—that is, when it is arbitrary, irrational, and unreasonable. A spot zone is in the public interest as long as there is a reasonable basis for the belief that the spot zone has substantial relation to the public health, safety, morals or general welfare. And, if the spot zone is part of a specific plan, the spot zone must also—like all parts of a specific plan—be compatible with the general plan of which the specific plan is a part. *Gov. Code, §§ 65454, 66473.5*. A specific plan is compatible if it is in agreement or harmony with the terms of the applicable general plan, not in rigid conformity with every detail thereof.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Ordinances

Business & Corporate Compliance > ... > Real Property Law > Zoning > Spot Zoning

### [HN28](#) [↓] **Zoning, Ordinances**

A city council's motive for enacting a zoning ordinance is irrelevant to a spot zoning inquiry because the validity of legislative acts must be measured by the terms of the legislation itself, and not by the motives of, or the influences upon, the legislators who enacted the measure. The wisdom or good policy of a zoning ordinance is for a

municipality to determine and the courts have nothing to do with it.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Local Planning

## [HN29](#) [📄] **Zoning, Local Planning**

The law does not state that a specific plan may never be amended. [Gov. Code, §§ 65453, 65454](#). The approval of a specific plan does not create a vested right to develop property in a manner consistent with the specific plan, or to prevent development inconsistent with it.

## **Headnotes/Syllabus**

### **Summary**

[\*561] CALIFORNIA OFFICIAL REPORTS SUMMARY

The trial court granted a writ of mandate upon concluding that an ordinance that amended a specific plan to create a new subzone for large commercial development and rezoned a store under construction into that subzone did not comply with the California Environmental Quality Act ([Pub. Resources Code, § 21000 et seq.](#)). (Superior Court of Los Angeles County, Nos. BS162678 and BS162710, Richard L. Fruin, Jr., Judge.)

The Court of Appeal reversed, holding that the ordinance was not a new project ([Pub. Resources Code, § 21065](#)) and did not require a subsequent or supplemental environmental impact report ([Pub. Resources Code, § 21166](#)) because substantial evidence supported the city council's finding that the sole reasonably foreseeable consequence of creating the subzone was the construction of the store, as to which environmental review had been completed. The ordinance did not result in impermissible spot zoning because it was unclear whether the new subzone was less restrictive, the city had a reasonable basis to find that the ordinance was in the public interest and compatible

with other plans, and amending the specific plan was permissible ([Gov. Code, §§ 65453, 65454, 66473.5](#)). (Opinion by Hoffstadt, J., with Ashmann-Gerst, Acting P. J., and Chavez, J., concurring.)

### **Headnotes**

CALIFORNIA OFFICIAL REPORTS HEADNOTES

#### [CA\(1\)](#) [📄] (1)

**Municipalities § 49—Ordinances—Construction—Plain Language.**

In evaluating the meaning of an ordinance, like any other statute, a court looks first to the enactment's plain language. Courts interpret ordinances by the same rules applicable to statutes. Statutory analysis begins with the plain language of a statute, and if that language is unambiguous, the inquiry ends there as well.

#### [CA\(2\)](#) [📄] (2)

**Statutes § 20—Construction—Judicial Function—Prohibition Against Changing Scope.**

Courts may not change the scope of a statute by reading into it language it does not contain or by reading out of it language it does.

#### [CA\(3\)](#) [📄] (3)

**Statutes § 21—Construction—Legislative Intent—Omitted Provision.**

A legislative body's rejection of a specific provision is evidence that the ultimately enacted law should not be construed to include the omitted provision.

#### [CA\(4\)](#) [📄] (4)

**Pollution and Conservation Laws § 1.2—California Environmental Quality Act—Purpose—**

### Fully Informed Decisions.

The California Environmental Quality Act (***CEQA***) ([Pub. Resources Code, § 21000 et seq.](#)), is designed to ensure that the long-term protection of the environment shall be the guiding criterion in public decisions. ***CEQA*** operates, not by dictating proenvironmental outcomes, but rather by mandating that decision makers and the public study the likely environmental effects of contemplated government actions and thus make fully informed decisions regarding those actions. In other words, ***CEQA*** does not care what decision is made as long as it is an informed one.

### [CA\(5\)](#) [↓] (5)

#### Pollution and Conservation Laws § 1.6— California Environmental Quality Act—Projects— What Constitutes.

When a state or local public agency is planning an activity for which there has been no prior California Environmental Quality Act (***CEQA***) ([Pub. Resources Code, § 21000 et seq.](#)) review, ***CEQA*** dictates a three-step process ([Cal. Code Regs., tit. 14, § 15002, subd. \(k\)](#)). In the first step, the agency is to conduct a preliminary review to assess whether the contemplated action (1) qualifies as a project falling within ***CEQA***'s ambit and, if it does, (2) whether the project nevertheless falls within one of ***CEQA***'s threshold exemptions ([Cal. Code Regs., tit. 14, § 15060](#)). An action qualifies as a “project” if it is an activity which may cause either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, and is undertaken by the public agency itself or by private persons with the agency's support or approval ([Pub. Resources Code, § 21065](#); [Cal. Code Regs., tit. 14, § 15378, subd. \(a\)](#)).

#### Pollution and Conservation Laws § 1.6—

### California Environmental Quality Act—Projects— Adoption of Plans.

A project within the California Environmental Quality Act ([Pub. Resources Code, § 21000 et seq.](#)) includes the adoption and amendment of a city's or county's general plan (which is its comprehensive, long-term general plan for the physical development of the county or city) and its specific plans (which are plans for the systematic implementation of the general plan for all or part of the area covered by the general plan) ([Cal. Code Regs., tit. 14, § 15378, subd. \(a\)\(1\)](#); [Gov. Code, §§ 65300, 65450](#)).

### [CA\(7\)](#) [↓] (7)

#### Pollution and Conservation Laws § 1.8— California Environmental Quality Act—Projects— Exemptions—Types.

A project may be exempt from the California Environmental Quality Act (***CEQA***) ([Pub. Resources Code, § 21000 et seq.](#)) if it falls within any of the following types of threshold exemptions: (1) those defined by the Legislature in ***CEQA*** itself (so-called statutory exemptions) ([Pub. Resources Code, § 21080, subd. \(b\)](#); [Cal. Code Regs., tit. 14, §§ 15260–15282](#)); (2) those the Legislature empowered the Secretary of the Natural Resources Agency to recognize as categorically exempt (so-called categorical exemptions) ([Pub. Resources Code, § 21084, subd. \(a\)](#), and [Cal. Code Regs., tit. 14, §§ 15300–15333](#)); or (3) the exemption for projects for which it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment (the so-called common sense exemption) ([Cal. Code Regs., tit. 14, § 15061, subd. \(b\)\(3\)](#)). If the action is not a project, ***CEQA*** requires no further action; if the action is a project but is exempt, ***CEQA*** requires the filing of a notice of exemption ([Cal. Code Regs., tit. 14, § 15062](#)).

### [CA\(8\)](#) [↓] (8)

**Pollution and Conservation Laws § 2.2—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Negative Declaration—When Issued.**

In the second step of a California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) analysis, which is only reached for a nonexempt project, the agency is to conduct a more indepth initial study to assess whether there is substantial evidence supporting a fair argument that the project may have significant adverse effects on the environment (*Pub. Resources Code, § 21082.2, subd. (a); Cal. Code Regs., tit. 14, § 15064, subd. (f)(1)*). If the initial study reveals no such effect or an effect that can be avoided entirely or mitigated into insignificance, the agency may issue a negative declaration or a mitigated negative declaration, respectively, that so indicates (*Pub. Resources Code, § 21080, subd. (c); Cal. Code Regs., tit. 14, §§ 15063, subd. (b)(2), 15070, 15071*).

[\*564] [CA\(9\)](#) [↓] (9)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Fair Argument Standard.**

In the third step of a California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) analysis, which is only reached if there is a fair argument that the project may have significant adverse environmental effects, the agency is to prepare a full-blown environmental impact report (*Pub. Resources Code, §§ 21080, subd. (d), 21082.2, subd. (d)*).

[CA\(10\)](#) [↓] (10)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental Report.**

When a state or local public agency is considering a

project for which there has already been prior California Environmental Quality Act (*CEQA*) (*Pub. Resources Code, § 21000 et seq.*) review—whether that review has led to the preparation of an environmental impact report or instead to the issuance of a negative declaration (mitigated or not)—*Pub. Resources Code, § 21166*, provides that the agency is not to prepare a subsequent or supplemental environmental impact report or negative declaration unless: (1) substantial changes are proposed in the project which will require major revisions of the environmental impact report or, if the prior review precipitated a negative declaration, the preparation of an environmental impact report; (2) substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report or, if the prior review precipitated a negative declaration, the preparation of such an environmental impact report; or (3) new information, which was not known and could not have been known at the time the environmental impact report was certified as complete, or the negative declaration was issued, becomes available.

[CA\(11\)](#) [↓] (11)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental Report.**

Unless one of the three exceptions in *Pub. Resources Code, § 21166*, applies, an agency may not prepare a new or supplemental environmental impact report. The agency must instead prepare an addendum to its prior California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) analysis (*Cal. Code Regs., tit. 14, § 15164*).

[CA\(12\)](#) [↓] (12)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—**

**Environmental Impact Reports—Necessity of Preparing—Subsequent or Supplemental Report.**

[CA\(14\)](#) (14)

The answer to the question of whether a project has had prior environmental review or is an entirely [\*565] new project does not turn on any abstract characterization of the project as “new” or “old.” Instead, it turns on whether the previous environmental document retains any relevance in light of the proposed changes. A prior environmental document will in most cases remain relevant when the prior California Environmental Quality Act (*CEQA*) (*Pub. Resources Code, § 21000 et seq.*) analysis and the current *CEQA* analysis pertain to related projects at the same level of generality — that is, when both deal with a specific development or both deal with a more generalized program (such as a general plan or a specific plan). But what if the related projects operate at different levels of generality? What if the prior *CEQA* analysis pertained to a specific development while the current project deals with a more generalized program? Or vice versa? Does this difference render *Pub. Resources Code, § 21166*, inapplicable? The answer is “no.”

[CA\(13\)](#) (13)

**Pollution and Conservation Laws § 2.1—California Environmental Quality Act—Environmental Impact Reports—Necessity of Preparing—Subsequent or Supplemental Report.**

The primary consideration as to whether *Pub. Resources Code, § 21166*, applies is whether the previous environmental document retains any relevance in light of the proposed changes. That consideration looks to the continued relevance of the information provided by the prior California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) analysis, not the type of project for which it was generated. Courts have more generally declined to attach too much significance to the semantic label a project bears. Placing definitive weight on the label can lead to an absurd result.

**Pollution and Conservation Laws § 1.6—California Environmental Quality Act—Projects—Categorization as Change to Plan or Approval of Specific Development.**

Projects that could be categorized either as a change to a general or specific plan or as the approval of a specific development are to be evaluated under the California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) as a specific development (*Cal. Code Regs., tit. 14, § 15378, subd. (d)*).

[CA\(15\)](#) (15)

**Pollution and Conservation Laws § 2.1—California Environmental Quality Act—Environmental Impact Reports—Necessity of Preparing—Subsequent or Supplemental Report.**

The accuracy of the information in the prior California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) analysis does not affect its relevance under *Pub. Resources Code, § 21166*. *Section 21166* applies even if the initial review is discovered to have been inaccurate and misleading in the description of a significant effect or the severity of its consequences.

[\*566] [CA\(16\)](#) (16)

**Judgments § 66—Void Judgments and Collateral Attack—Grounds—Absence of Fundamental Jurisdiction.**

A collateral attack on a final judgment is only permissible where the prior judgment is void because of an absence of fundamental jurisdiction.

[CA\(17\)](#) (17)

**Pollution and Conservation Laws § 2.1—**

**California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental Report.**

[Pub. Resources Code, § 21166](#), provides that, where an agency has engaged in a prior California Environmental Quality Act (CEQA) ([Pub. Resources Code, § 21000 et seq.](#)) review that retains relevance to the project currently under consideration, the agency must file an addendum (either to a prior environmental impact report or prior negative declaration) unless (1) there have been substantial changes in either the project or the circumstances under which the project is being undertaken, which will require major revisions of the prior environmental impact report or negative declaration, or (2) there is new information that was not known and could not have been known at the time of the prior CEQA review. If these conditions exist, the agency must prepare a subsequent or supplemental report. CEQA itself provides no further guidance on what these standards mean, but the Guidelines for the Implementation of the California Environmental Quality Act ([Cal. Code Regs., tit. 14, § 15000 et seq.](#)) do. Major revisions to a CEQA review document will be required, and new information will warrant a new document, when the project currently under consideration involves new significant environmental effects or a substantial increase in the severity of previously identified significant effects or the new information shows the same ([Cal. Code Regs., tit. 14, § 15162, subd. \(a\)](#)).

[CA\(18\)](#)[\[↓\]](#) (18)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental Report.**

An inquiry under [Cal. Code Regs., tit. 14, § 15162, subd. \(a\)](#), into whether a prior California Environmental Quality Act (CEQA) ([Pub. Resources Code, § 21000 et seq.](#)) review of a project is sufficient in scope vis-à-vis subsequent

changes to that project is functionally indistinguishable from the question whether a current CEQA review of a project is sufficient in scope vis-à-vis possible future actions flowing from that project. In both instances, the fundamental question is the same: Does the existing CEQA document encapsulate all of the environmentally significant impacts of the project? In the latter instance, further CEQA analysis is required only (1) if the future expansion or other action is a reasonably foreseeable consequence of the initial project, and (2) if that future expansion or action will be significant in that it will likely change the scope or nature of the initial project or its environmental effects. The [\*567] same test should be applied in both instances, including under [Pub. Resources Code, § 21166](#).

[CA\(19\)](#)[\[↓\]](#) (19)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental  
Report—Reasonably Foreseeable Consequences.**

An inquiry into whether a consequence of a project is reasonably foreseeable, and thus requires further California Environmental Quality Act (CEQA) ([Pub. Resources Code, § 21000 et seq.](#)) review, depends on how broadly CEQA construes the concept of reasonable foreseeability. On the one hand, construing reasonable foreseeability too narrowly means that a consequence may not be evaluated until it is too late. This is problematic because the failure to consider a consequence (1) can violate CEQA's mandate that agencies consider the cumulative and total effect of a project rather than chopping a large project into many little ones, each with a minimal potential impact on the environment; (2) risks that the agency will not consider that consequence until after the project has been approved, at which point the steamroller effect of development makes it nearly impossible to deflect the momentum for that project; and (3) risks

that the agency will have already otherwise made up its mind, rendering any study of the consequence little more than a burdensome reconsideration of decisions already made or a post hoc rationalization to support action already taken. On the other hand, construing reasonable foreseeability too broadly means that a consequence may be evaluated too early.

[CA\(20\)](#) (20)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental  
Report—Reasonably Foreseeable Consequences.**

Courts have deemed a consequence of a project under the California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) to be reasonably foreseeable only when that consequence is, as a practical matter, sufficiently certain to happen. The degree of certainty has been found to be sufficient in five different situations. First, a consequence is reasonably foreseeable when the agency has already committed itself to undertake the consequence (*Cal. Code Regs., tit. 14, § 15165*). Second, a consequence is reasonably foreseeable when the project under review presupposes the occurrence of that consequence—that is, when the consequence is a necessary and essential component of the project itself. Third, a consequence is reasonably foreseeable when it is itself under environmental review. Fourth, a consequence is reasonably foreseeable when the agency subjectively intends or anticipates the consequence, and the project under review is meant to be the first step [\*568] toward that consequence. Lastly, a consequence is reasonably foreseeable if the project under review creates an incentive that is all but certain to result in the consequence.

[CA\(21\)](#) (21)

**Pollution and Conservation Laws § 2.1—**

**California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental  
Report—Reasonably Foreseeable Consequences.**

If a consequence falls into any of the categories that the case law has found to be reasonably foreseeable and is sufficiently certain to come to pass that it warrants evaluation under the California Environmental Quality Act (*CEQA*) (*Pub. Resources Code, § 21000 et seq.*), it does not matter that the consequence might be subject to later *CEQA* review when its contours become more concrete. Nor does it matter that the consequence's contours are hazy and thus its impact cannot be gauged with exactitude. *Cal. Code Regs., tit. 14, § 15151*, provides that agencies should proceed in the light of what is reasonably feasible information.

[CA\(22\)](#) (22)

**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental  
Report—Reasonably Foreseeable Consequences.**

A consequence is not reasonably foreseeable when it is entirely independent of the project under consideration. A consequence is not reasonably foreseeable simply because the project under consideration makes that consequence a possibility—even when the public agency is subjectively aware of that possibility (that is, even when it is a gleam in the planner's eye). And, a consequence is not reasonably foreseeable merely because the project creates an incentive for that consequence to come to pass (unless that incentive makes the consequence all but certain). In these situations, the California Environmental Quality Act (*Pub. Resources Code, § 21000 et seq.*) does not exempt the consequence from environmental review; it merely postpones that review until the consequence is sufficiently certain.

[CA\(23\)](#) [↓] (23)**Pollution and Conservation Laws § 2.1—  
California Environmental Quality Act—  
Environmental Impact Reports—Necessity of  
Preparing—Subsequent or Supplemental  
Report—Reasonably Foreseeable Consequences.**

Substantial evidence supported a city council's finding that the sole reasonably foreseeable consequence of creating a subzone was the construction of a particular store. The city created a new subzone and rezoned only one development into that subzone. Updating its prior report analyzing that development complied with the California Environmental Quality Act (*CEQA*) (*Pub. Resources Code, § 21000 et seq.*). The trial court held that *Pub. Resources Code, § 21166*, did not apply [\*569] because the city council's amendment of a specific plan altered the method by which the store was approved (that is, by amending the plan rather than granting variances from it), and thus constituted a substantial change with respect to the circumstances under which the store was being undertaken, thereby falling into one of the *§ 21166* exceptions (*§ 21166, subd. (b)*). This analysis was incorrect because it ignored that the exception for changed circumstances by its terms only applies when that change will require major revisions in the agency's *CEQA* analysis (*§ 21166, subd. (b)*); a change in circumstances, by itself, is not enough. Major revisions are required only when the change creates reasonably foreseeable consequences that are not addressed by prior *CEQA* review, and there were no such consequences.

[Manaster & Selmi, Cal. Environmental Law & Land Use Practice (2018) ch. 22, § 22.07; Cal. Forms of Pleading and Practice (2018) ch. 418, Pollution and Environmental Matters, § 418.35.]

[CA\(24\)](#) [↓] (24)**Zoning and Planning § 12—Validity of  
Ordinances—Unreasonable or Discriminatory—  
Spot Zoning.**

Spot zoning occurs when a parcel of land is rezoned to give it fewer or greater rights than the parcels surrounding it. Although spot zoning traditionally refers to the creation of islands with more restrictive zoning, it can also refer to the creation of islands with less restrictive zoning. Because local bodies enjoy broad legislative discretion when it comes to zoning, however, spot zoning is not necessarily invalid. The burden is on the party challenging the spot zoning to show that the spot zoning was invalid and hence an abuse of that discretion. The creation of a spot zone is invalid only when it is not in the public interest—that is, when it is arbitrary, irrational, and unreasonable. A spot zone is in the public interest as long as there is a reasonable basis for the belief that the spot zone has substantial relation to the public health, safety, morals or general welfare. And, if the spot zone is part of a specific plan, the spot zone must also—like all parts of a specific plan—be compatible with the general plan of which the specific plan is a part (*Gov. Code, §§ 65454, 66473.5*). A specific plan is compatible if it is in agreement or harmony with the terms of the applicable general plan, not in rigid conformity with every detail thereof.

[CA\(25\)](#) [↓] (25)**Zoning and Planning § 12—Validity of  
Ordinances—Unreasonable or Discriminatory—  
Spot Zoning.**

A city council's motive for enacting a zoning ordinance is irrelevant to a spot zoning inquiry because the validity of legislative acts must be measured by the terms of the legislation itself, and not by the motives of, or the influences upon, the legislators who enacted the measure. The wisdom or good policy of a zoning ordinance is for a municipality to determine and the courts have nothing to do with it.

[\*570] [CA\(26\)](#) [↓] (26)

## Zoning and Planning § 15—Amendment of Plans—Specific Plans.

The law does not state that a specific plan may never be amended (*Gov. Code, §§ 65453, 65454*). The approval of a specific plan does not create a vested right to develop property in a manner consistent with the specific plan, or to prevent development inconsistent with it.

## Opinion

[\*\*318] **HOFFSTADT, J.**—A city council passed an ordinance that (1) amended its neighborhood-based “specific plan” to create a new subzone for large commercial development, and (2) placed a half-built Super Target retail store into that new subzone. Two citizens groups attacked the city’s [\*\*\*2] ordinance, and the trial court ruled that the city violated [\*\*319] the *California Environmental Quality Act (CEQA)* (*Pub.*

*Resources Code, § 21000 et seq.*)<sup>1</sup> because the city treated the creation of the new subzone as a follow-on to its prior, initial approval of the Target store rather than as an entirely new “project” under *CEQA*.

This appeal presents two questions. First, when a public agency has previously approved an environmental impact report for a specific development and subsequently amends its specific plan to authorize that development, how is that subsequent amendment to be analyzed under *CEQA*—as an entirely new “project” (subject to *CEQA*’s three-tiered approach), or instead as a project for which an environmental impact report has already been [\*571] prepared under *section 21166*? Second, does the ordinance in this case constitute impermissible “spot zoning” because it places the Super Target store in an “island” of ostensibly less restrictive zoning?

We hold that the city’s ordinance should be examined under *section 21166*, and conclude that the city complied with *CEQA* in proceeding by way of an addendum to the prior environmental impact report because substantial evidence supports the city’s finding that the specific plan amendment would not have any [\*\*\*3] reasonably foreseeable environmental consequences beyond the construction of the Super Target store. We also hold that the ordinance constituted “spot zoning,” but that it was permissible because the city did not abuse its discretion in finding that its amendment to the specific plan was in the public interest and compatible with the general plans of which it was a part. Accordingly, we reverse the trial court.

## FACTS AND PROCEDURAL BACKGROUND

### I. Facts

#### A. The Planned Target Superstore

After initially proposing a smaller store, real party

<sup>1</sup> All further statutory references are to the Public Resources Code unless otherwise indicated.

in interest Target Corporation (Target) eventually applied to defendant City Council of the City of Los Angeles (the City or City Council) to build a Super Target retail store (the Superstore). Target sought to build a nearly 75-foot tall, three-story structure: the third (and top) floor would house the 163,862-square-foot Superstore; the second floor would be a parking lot; and the ground floor would be home to several smaller retail stores, a pedestrian plaza, and a transit kiosk.

The Superstore was to be located at the intersection of Sunset Boulevard and Western Avenue in Hollywood, California. That location is within two so-called “general plans” (the [\*\*\*4] General Plan of the City of Los Angeles and the Hollywood Community Plan) and one “specific plan” (the Vermont/Western Transit Oriented District Specific Plan), the latter of which is also known as a station neighborhood area plan (or SNAP). At the time the Superstore was first proposed, the SNAP had five subzones (designated as “Subareas A through E”), and the Superstore was located in Subarea C.

### B. Initial Analysis and Approvals

The City Council commissioned and prepared an environmental impact report for the Superstore.

[\*572]

Because the proposed Superstore exceeded the height and parking space limitations of Subarea C, among other requirements, the City Council granted eight [\*\*320] variances (called “exceptions”) from the SNAP pursuant to Los Angeles Municipal Code section 11.5.7.F.2. Taken together, these variances largely authorized the Superstore to be built as proposed.

The City Council also approved the environmental impact report. Target began construction of the Superstore.

### C. Target I Litigation

Plaintiffs La Mirada Avenue Neighborhood Association of Hollywood (La Mirada) and Citizens Coalition Los Angeles (Citizens Coalition)

(collectively, plaintiffs), both of which are “community association[s]” that “advocate for residential [\*\*\*5] quality of life issues,” filed separate petitions for a writ of mandate against the City (and naming Target as the real party in interest). As pertinent to this appeal, plaintiffs alleged that (1) the City's environmental impact report was deficient, thereby violating [CEQA](#), and (2) the City Council's grant of variances was not supported by substantial evidence, thereby violating the Los Angeles Municipal Code.<sup>2</sup>

The trial court partially denied and partially granted plaintiffs' writ petitions. The court ruled that the environmental impact report was sufficient, but that six of the eight variances were not supported by substantial evidence.<sup>3</sup> The court ordered all construction to cease.

Target appealed, and La Mirada cross-appealed.

### D. Amendment of the SNAP

While the appeals of the trial court's judgment were pending, the City Council enacted Los Angeles Ordinance No. 184,414 (the Ordinance or SNAP Amendment).

The Ordinance changed the law in two ways relevant to this appeal.

First, section 12 of the Ordinance created a new “Subarea F” within the SNAP. Subarea F, denominated as [\*573] a “Large Scale Commercial Node.” (Boldface & some capitalization omitted.) Commercial developments within [\*\*\*6] Subarea F that were “[ (1) over 100,000 square feet [(2)] on existing sites of over 3.5 acres, [(3)] within a quarter-mile of a transit station, and [(4)] within a

<sup>2</sup> Plaintiffs also alleged that the City Council violated the laws on open meetings and denied them a fair hearing. Plaintiffs voluntarily dismissed the open meeting claim, and the trial court rejected the fair hearing claim.

<sup>3</sup> The trial court also awarded attorney's fees pursuant to [Code of Civil Procedure section 1021.5](#). We subsequently affirmed that award. (*La Mirada Avenue Neighborhood Assn. of Hollywood v. City of Los Angeles* (2018) 22 Cal.App.5th 1149 [232 Cal. Rptr. 3d 338].)

quarter-mile of freeway on and off ramps” could reach up to 75 feet in height and need only “substantially conform” with the SNAP’s building facade requirements. But any such development would also be required to dedicate “at least 80%” of its ground-floor street frontage to retail uses, community facilities, and “other similar active uses”; to include pedestrian throughways along that frontage; include a pedestrian plaza of at least 10 percent of the “floor area,” which must feature a transit kiosk, seating for the public, and an “Integrated Mobility Hub”; and build out at least 20 percent of its parking for electric vehicles.

Second, the Ordinance designated one location within the SNAP’s area as Subarea F—namely, the location where the Superstore was being built.<sup>4</sup>

[\*\*321] Although two other locations within the SNAP’s boundaries were 3.5 acres in size and within a quarter-mile of transit stations and freeway access (three of the four eligibility requirements for Subarea F), the Ordinance did not rezone [\*\*\*7] either of those locations into Subarea F, and the City has acknowledged that the City Council would need to pass another ordinance that redefined Subarea F to include the geographic location to be developed.

### E. Dismissal of Appeal

In light of the Ordinance, a different division of this court dismissed the pending appeals as moot, but left the trial court’s final judgment intact. (*La Mirada Avenue Neighborhood Assn. of Hollywood v. City of Los Angeles* (2016) 2 Cal.App.5th 586, 589–592 [206 Cal. Rptr. 3d 343].)

### F. Addendum to the Prior Environmental Impact Report

The City prepared an “Addendum to the Certified [Environmental Impact Report] for the Target at

Sunset and Western Project” (boldface & some capitalization omitted; the Addendum). The Addendum defined the “Revised Project” as (1) the amendment of the SNAP (as well as amendments of the Hollywood Community Plan and the transportation element of the City’s General Plan), and (2) “all construction activities needed to complete the existing structure and the operation of” the Superstore.

[\*574]

The Addendum examined “whether the impacts of the Revised Project are the same, higher or lower than the Original Project” (which dealt solely with the construction of the Superstore). To provide the most up-to-date [\*\*\*8] information, the City conducted updated analyses of air quality, greenhouse gases, noise, and traffic. The City then examined the full range of relevant environmental factors.

The City concluded that the Revised Project would “not require major revisions of the” previously certified environmental impact report because the SNAP Amendment did not involve any “new significant environmental effects or a substantial increase in the severity of previously identified significant effects.” Because “none of [the] conditions ... requiring preparation of a subsequent [environmental impact report]” under [section 21166](#) were “present,” the City proceeded by way of Addendum.

The City Council approved the Addendum.

### II. Procedural Background

Plaintiffs filed two further petitions for a writ of mandate. In the operative petitions, plaintiffs alleged that the City: (1) violated [CEQA](#) by relying on the Addendum rather than authoring a “subsequent, supplement, or new [environmental impact report] for the new project that included a proposed amendment of the SNAP”; and (2) committed impermissible “spot zoning” by making the less onerous zoning requirements embodied in

<sup>4</sup>La Mirada suggests in a footnote that the Superstore does not meet all of Subarea F’s proximity-to-transit requirements, but has forfeited this argument by raising it for the first time on appeal in a passing reference in a footnote.

Subarea F applicable only to the Superstore.<sup>5</sup>

Following exhaustive [\*\*\*9] briefing and oral argument, the trial court granted the writ petition on the ground that the City violated [CEQA](#). Because, in the court's view, the Ordinance amended the SNAP, it was an “independent project” from the Superstore, making it inappropriate to rely on [\*\*322] an addendum that evaluated the environmental impact of only the Superstore. Thus, the City was obligated to conduct a wholly independent [CEQA](#) analysis. Further, because the Ordinance's creation of Subarea F “allows and encourages the development of large scale retail projects,” the court found that the Ordinance made it “reasonably foreseeable that multiple retail projects will apply for Subarea F Status” on the two other parcels that currently meet Subarea F's size and proximity-to-transit requirements. Thus, the court concluded, the City was obligated under [CEQA](#) to conduct an “initial study” to assess whether a fully separate environmental impact report should be prepared. The court declined to proceed under the [CEQA](#) provision that applies “[w]hen an [\*\*575] environmental impact report has [already] been prepared for a project” (under [§ 21166](#)) because, in its view, that provision does not apply when there is a “[s]ubstantial change[] ... with respect to [\*\*\*10] the circumstances under which the project is being undertaken” ([§ 21166, subd. \(b\)](#)); as the court saw it, the Ordinance “changed” “the ‘entitlements vehicle’ for ... its approval” of the Superstore, and thus constituted a “changed circumstance.”

The court declined to reach the spot zoning issue.

After the trial court entered judgment, the City and Target filed timely notices of appeal.

## DISCUSSION

<sup>5</sup> Plaintiffs also alleged that the Ordinance and its approval of the Addendum violated the Los Angeles Municipal Code in a number of ways, but the trial court rejected these claims and plaintiffs have not cross-appealed.

On appeal, the parties raise two issues: (1) Did the City's reliance on the Addendum violate [CEQA](#), and (2) Did the City engage in impermissible “spot zoning”?<sup>6</sup> In evaluating both of these questions, our task is to evaluate what *the agency*—here, the City Council—did. ([§ 21168.5](#) [as to [CEQA](#)]; [Foothill Communities Coalition v. County of Orange \(2014\) 222 Cal.App.4th 1302, 1307 \[166 Cal. Rptr. 3d 627\]](#) (*Foothill Communities*) [as to spot zoning].) We owe no deference to the trial court. ([Communities for a Better Environment v. City of Richmond \(2010\) 184 Cal.App.4th 70, 80 \[108 Cal. Rptr. 3d 478\]](#) (*City of Richmond*) [[HNI](#)][[↑](#)] “In reviewing compliance with [CEQA](#), we review the agency's action, not the trial court's decision”]; see [Foothill Communities, at p. 1307](#) [same, as to spot zoning].)

### I. Is There a [CEQA](#) Violation?

Answering the [CEQA](#) question presented by this case is challenging because, in the words of the poet Henry Wadsworth Longfellow, the parties' arguments are “[s]hips that pass in the night.” Plaintiffs argue that the Ordinance amended the SNAP to create a “free-floating” subzone [\*\*\*11] that is attractive to large commercial development; that the Ordinance is therefore a “project” separate and distinct from the construction of the Superstore; and that the City is therefore required by [CEQA](#) to start from the beginning by conducting an “initial study” of the SNAP Amendment's effects and, if warranted, an entirely separate environmental impact report. The City and Target, on the other hand, argue that the Ordinance *both* created a new Subarea F *and* placed the Superstore into that subarea; that there is already a final environmental impact report for the Superstore; and that the City was [\*\*576] required by [CEQA](#) only to examine whether, under [section 21166](#), the SNAP Amendment will “require major revisions in the environmental impact report” and to prepare

<sup>6</sup> Although the trial court did not reach the spot zoning issue, the parties have fully briefed the issue, and we address it in the interest of providing a final resolution to this long-pending matter.

[\*\*323] a supplemental report only if major revisions were necessary. (§ 21166, *subd. (b)*.) As our summaries suggest, the parties' contrasting positions even disagree on what the Ordinance does.

Accordingly, we approach the CEQA question by asking three questions: (1) what does the Ordinance do?; (2) which provisions of CEQA apply to the Ordinance—the provisions governing “projects” for which there is no prior CEQA analysis or the provision (namely, § 21166) that applies when there has already been a [\*\*\*12] prior CEQA analysis?; and (3) did the City Council comply with the applicable provision(s)?

#### A. What does the Ordinance do?

HN2 [↑] CA(1) [↑] (1) In evaluating the meaning of the Ordinance, like any other statute, we look first to the enactment's plain language. (*Amaral v. Cintas Corp. No. 2 (2008) 163 Cal.App.4th 1157, 1183 [78 Cal. Rptr. 3d 572]* [“We interpret ordinances by the same rules applicable to statutes”]; *KB Home Greater Los Angeles, Inc. v Superior Court (2014) 223 Cal.App.4th 1471, 1476 [168 Cal. Rptr. 3d 142]* [“Statutory analysis begins with the plain language of [a] statute, and if that language is unambiguous, the inquiry ends there” as well].) By its unambiguous language, the Ordinance does two things: (1) it creates Subarea F, a new subzone within the SNAP for large commercial development, and (2) it moves the parcel of land where the Superstore is being erected from Subarea C into Subarea F.

CA(2) [↑] (2) Target contends that the Ordinance applies solely to the Superstore. Target is right insofar as the City Council only placed the Superstore's parcel into Subarea F, but it is wrong insofar as the Ordinance also more generally spells out the requirements (in terms of parcel size, development size, and proximity-to-transit) that must be met before *any* parcel can be redesignated into Subarea F. To the extent Target invites us to disregard the Ordinance's language enumerating these eligibility [\*\*\*13] requirements, it is an

invitation we must decline. (*Vasquez v. State of California (2008) 45 Cal.4th 243, 253 [85 Cal. Rptr. 3d 466, 195 P.3d 1049]* [HN3 [↑]] courts may not “change [the] scope [of a statute] by reading into it language it does not contain or by reading out of it language it does”].)

CA(3) [↑] (3) Plaintiffs raise three arguments. First, they assert that the Ordinance is a “free-floating” subzone that automatically puts all parcels meeting Subarea F's parcel size and proximity requirements into that subarea. This assertion is incorrect because the Ordinance defines the subarea's application by reference to an attached map (Ordinance, § 12.A), and the map only designates [\*577] the Superstore's parcel. Second, plaintiffs assert that two maps prepared by Target while it was lobbying for the Ordinance showed three parcels in Subarea F. This assertion is true, but irrelevant because the City Council ultimately used a map that included only one parcel—the Superstore's—in Subarea F. (See *Crespin v. Kizer (1990) 226 Cal.App.3d 498, 514 [276 Cal. Rptr. 571]* [HN4 [↑]] a legislative body's “rejection ... of [\*\*\*14] a specific provision” is evidence that the ultimately enacted law “should not be construed to include the omitted provision”].) Lastly, plaintiffs assert that reading the Ordinance only to apply to Target as opposed to all three parcels would result in “haphazard” development. This concern does not trump the Ordinance's plain language. And as discussed [\*\*324] below in the analysis of the spot zoning issue, the SNAP Amendment is consistent with the SNAP's policies and is a rational means by which the City Council is permissibly taking one step at a time.

#### B. Under which provisions of CEQA should the Ordinance be analyzed?

##### 1. Background

##### a. CEQA, generally

HN5 [↑] CA(4) [↑] (4) CEQA is designed “to [e]nsure that the long-term protection of the environment shall be the guiding criterion in public

decisions.””” (*Friends of College of San Mateo Gardens v. San Mateo County Community College Dist.* (2016) 1 Cal.5th 937, 944 [207 Cal. Rptr. 3d 314, 378 P.3d 687] (*San Mateo Gardens*), quoting *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.3d 68, 74 [118 Cal. Rptr. 34, 529 P.2d 66].) **CEQA** operates, not by dictating proenvironmental outcomes, but rather by mandating that “decision makers and the public” study the likely environmental effects of contemplated government actions and thus make fully informed decisions regarding those actions. (*Neighbors for Smart Rail v. Exposition Metro Line Construction Authority* (2013) 57 Cal.4th 439, 447 [160 Cal. Rptr. 3d 1, 304 P.3d 499]; *Cal. Code Regs., tit. 14, § 15002, subd. (a)(1)* [a “basic purpose[] of **CEQA** [is] to ... [¶] ... [i]nform governmental decision makers and the public about the potential, significant environmental [\*\*\*15] effects of proposed activities”].) In other words, **CEQA** does not care what decision is made as long as it is an informed one.

[\*578]

b. How **CEQA** applies to projects for which there is no prior **CEQA** review

**HN6**[↑] **CA(5)**[↑] (5) When a state or local public agency is planning an activity for which there has been no prior **CEQA** review, **CEQA** dictates a “three-step process.” (*California Building Industry Assn. v. Bay Area Air Quality Management Dist.* (2015) 62 Cal.4th 369, 382 [196 Cal. Rptr. 3d 94, 362 P.3d 792]; see *Cal. Code Regs., tit. 14, § 15002, subd. (k)*.)

**CA(6)**[↑] (6) In the first step, the agency is to conduct a preliminary review to assess whether the contemplated action (1) qualifies as a “project” falling within **CEQA**'s ambit and, if it does, (2) whether the project nevertheless falls within one of **CEQA**'s threshold exemptions. (*California Building Industry Assn. v. Bay Area Air Quality Management Dist.* (2016) 2 Cal.App.5th 1067, 1080 [207 Cal. Rptr. 3d 911]; *Cal. Code Regs., tit. 14, § 15060* [discussing preliminary review].) An

action qualifies as a “project” if it is “an activity which may cause either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment,” and is undertaken by the public agency itself or by private persons with the agency's support or approval. (Pub. Resources Code, § 21065; see *Cal. Code Regs., tit. 14, § 15378, subd. (a)*.) As pertinent here, **HN7**[↑] a “project” includes “the adoption and amendment” of a city's or county's general plan (which is its “comprehensive, long-term general plan for the physical development of the county or city”) and its specific plans (which [\*\*\*16] are “plans for the systematic implementation of the general plan for all or part of the area covered by the general plan”). (*Cal. Code Regs., tit. 14, § 15378, subd. (a)(1)*; Gov. Code, §§ 65300 [defining “general plan”], 65450 [defining “specific plan[s]”].) **HN8**[↑] **CA(7)**[↑] (7) A project may be exempt from **CEQA** if it falls within any of the following types of threshold exemptions: (1) those defined by our Legislature in **CEQA** itself (so-called “statutory exemptions”) (*Pub. Resources Code, § 21080, subd. (b)*; *Cal. Code Regs., tit. 14, §§ 15260–15282*); (2) those our Legislature empowered the Secretary [\*\*325] of the Natural Resources Agency to recognize as categorically exempt (so-called “categorical exemptions”) (Pub. Resources Code, § 21084, subd. (a); *Cal. Code Regs., tit. 14, §§ 15300–15333*); or (3) the exemption for projects for which “it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment” (the so-called “common sense exemption”) (*Cal. Code Regs., tit. 14, § 15061, subd. (b)(3)*). If the action is not a project, **CEQA** requires no further action; if the action is a project but is exempt, **CEQA** requires the filing of a notice of exemption. (*Cal. Code Regs., tit. 14, § 15062*.)

**HN9**[↑] **CA(8)**[↑] (8) In the second step, which is only reached for a nonexempt project, the agency is to conduct a more indepth “initial study” to assess whether there is [\*579] “substantial evidence supporting a fair argument [that] the project may have significant adverse effects” [\*\*\*17] on the

environment. (*Communities for a Better Environment v. South Coast Air Quality Management Dist.* (2010) 48 Cal.4th 310, 319 [106 Cal. Rptr. 3d 502, 226 P.3d 985]; see *Cal. Code Regs., tit. 14, § 15064, subd. (f)(1)*; *Pub. Resources Code, § 21082.2, subd. (a)*.) If the initial study reveals no such effect or an effect that can be avoided entirely or mitigated into insignificance, the agency may issue a negative declaration or a mitigated negative declaration, respectively, that so indicates. (*Pub. Resources Code, § 21080, subd. (c)*; *Cal. Code Regs., tit. 14, §§ 15063, subd. (b)(2), 15070, 15071*.)

**HN10** [↑] **CA(9)** [↑] (9) In the third step, which is only reached if there is a fair argument that the project may have significant adverse environmental effects, the agency is to prepare a full-blown environmental impact report. (§§ 21080, subd. (d), 21082.2, subd. (d).)

**HN11** [↑] The threshold question of “[w]hether a proposed activity is a project” is either a “question of law” or a “predominantly legal question”; either way, it is to be decided by the courts without any deference to the agency’s determination. (*San Mateo Gardens, supra, 1 Cal.5th at pp. 952, 950* [calling it a “predominantly legal question”]; see *Muzzy Ranch Co. v. Solano County Airport Land Use Com.* (2007) 41 Cal.4th 372, 381–382 [60 Cal. Rptr. 3d 247, 160 P.3d 116] [calling it “an issue of law”].)

c. How **CEQA** applies to projects for which there has been prior **CEQA** review

**HN12** [↑] **CA(10)** [↑] (10) When a state or local public agency is considering a project for which there has already been prior **CEQA** review—whether that review has led to the preparation of an environmental impact report or instead to the issuance of a negative declaration (mitigated or not)—*section 21166* provides that the agency is *not* to prepare a “subsequent or supplemental [\*\*\*18] environmental impact report” or negative declaration unless: (1) “[s]ubstantial changes are

proposed in the project which will require major revisions of the environmental impact report” or, if the prior review precipitated a negative declaration, the preparation of an environmental impact report; (2) “[s]ubstantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report” or, if the prior review precipitated a negative declaration, the preparation of such an environmental impact report; or (3) “[n]ew information, which was not known and could not have been known at the time the environmental impact report was certified as complete,” or the negative declaration was issued, “becomes available.” (§ 21166 [applying when prior **CEQA** review prompted an environmental impact report]; see *San Mateo [\*580] Gardens, supra, 1 Cal.5th at pp. 949–950* [extending [\*\*\*326] § 21166 to situations in which the prior **CEQA** review resulted in a negative declaration].) **CA(11)** [↑] (11) Indeed, **HN13** [↑] unless one of these three exceptions applies, the agency *may not* prepare a new or supplemental environmental impact report. The agency must instead prepare an addendum to its prior **CEQA** analysis. (*Cal. Code Regs., tit. 14, § 15164*; *San Mateo Gardens, at pp. 946–947*; *Melom v. City of Madera* (2010) 183 Cal.App.4th 41, 48–49 [106 Cal. Rptr. 3d 755] (*Melom*); *Citizens for a Megaplex-Free Alameda v. City of Alameda* (2007) 149 Cal.App.4th 91, 103 [56 Cal. Rptr. 3d 728] (*Citizens for a Megaplex-Free [\*\*\*19] Alameda*)).

**HN14** [↑] Because the question “whether an initial environmental document remains relevant despite changed plans or circumstances—like the question whether an initial environmental document requires major revisions due to changed plans or circumstances—is a predominantly factual question,” our Supreme Court has held that “[i]t is ... a question for the agency to answer in the first instance, drawing on its particular expertise.” (*San Mateo Gardens, supra, 1 Cal.5th at pp. 952–953*.) Judicial review is accordingly confined to assessing “whether the agency’s determination is supported by substantial evidence.” (*Id. at pp. 943–944, 953*;

see *Latinos Unidos de Napa v. City of Napa* (2013) 221 Cal.App.4th 192, 204–205 [164 Cal. Rptr. 3d 274] (*Latinos Unidos*.) This more deferential review standard means that courts give greater deference to a public agency's determination whether further *CEQA* review is required than they do to whether, as noted above, initial *CEQA* review is required. This differential treatment “represents a shift in the applicable policy considerations”: Because, by this point in time, “in-depth review has already occurred,” “the interests of finality” are weightier, and “the statutory presumption flips in favor of the developer and against further review.” (*Melom, supra*, 183 Cal.App.4th at pp. 48, 49; *Moss v. County of Humboldt* (2008) 162 Cal.App.4th 1041, 1049–1050 [76 Cal. Rptr. 3d 428].) The question is no longer whether to conduct the environmental review process [\*\*\*20] in the first place, but rather “whether circumstances have changed enough to justify repeating a substantial portion of th[at] process.” (*Committee for Green Foothills v. Santa Clara County Bd. of Supervisors* (2010) 48 Cal.4th 32, 55 [105 Cal. Rptr. 3d 181, 224 P.3d 920].)

## 2. Analysis

It is undisputed that the City prepared an environmental impact report regarding the Superstore. Because the activity at issue in this case is not a change to the Superstore itself but instead the Ordinance amending the SNAP (to create a new subzone and to place the Superstore in that subzone), the question arises: Is the amendment of the SNAP a project for which there has [\*581] been prior *CEQA* review (which would make § 21166 applicable), or is it an entirely new project (which would call for the initiation of *CEQA*'s three-step analysis)?

CA(12)[↑] (12) As our Supreme Court recently held, HN15[↑] the answer to this question does not turn on “any abstract characterization of the project as ‘new’ or ‘old.’” (*San Mateo Gardens, supra*, 1 Cal.5th at p. 944.) Instead, it turns on “whether the previous environmental document retains any relevance in light of the proposed changes ... .”

(*Ibid.*)

A prior environmental document will in most cases remain relevant when the prior *CEQA* analysis and the current *CEQA* analysis pertain to related projects [\*\*327] at the same level of generality—that is, when both deal with a “specific development” [\*\*\*21] or both deal with a more generalized “program” (such as a general plan or a specific plan). (*San Mateo Gardens, supra*, 1 Cal.5th at pp. 959, 943–944 [prior and current actions deal with community college district's district-wide facilities improvement plan]; *Latinos Unidos, supra*, 221 Cal.App.4th at pp. 196–197, 203–205 [same, as to city's general plan]; *Citizens for a Megaplex-Free Alameda, supra*, 149 Cal.App.4th at pp. 102–104 [prior and current actions deal with development of theater complex]; *Mani Brothers Real Estate Group v. City of Los Angeles* (2007) 153 Cal.App.4th 1385, 1392 [64 Cal. Rptr. 3d 79] (*Mani Brothers*) [same, as to residential development]; *Bowman v. City of Petaluma* (1986) 185 Cal.App.3d 1065, 1070–1071 [230 Cal. Rptr. 413] [same]; *Santa Teresa Citizen Action Group v. City of San Jose* (2003) 114 Cal.App.4th 689, 704 [7 Cal. Rptr. 3d 868] [same, as to water recycling development]; *Fund for Environmental Defense v. County of Orange* (1988) 204 Cal.App.3d 1538, 1544 [252 Cal. Rptr. 79] (*Fund for Environmental Defense*) [same, as to medical research and laboratory complex development]; *River Valley Preservation Project v. Metropolitan Transit Development Bd.* (1995) 37 Cal.App.4th 154, 166–167 [43 Cal. Rptr. 2d 501] [same, as to light rail development]; *Benton v. Board of Supervisors* (1991) 226 Cal.App.3d 1467, 1477–1478 [277 Cal. Rptr. 481] [same, as to winery development]; see generally *Cal. Code Regs., tit. 14, §§ 15161* [defining “specific development” environmental impact report], *15168* [defining “program” environmental impact report].)

But what if the related projects operate at different levels of generality? What if, as here, the prior *CEQA* analysis pertained to a specific development while the current project deals with a more

generalized program? Or vice versa? Does this difference render [section 21166](#) inapplicable?

[CA\(13\)](#)<sup>[↑]</sup> (13) We conclude that the answer is “no,” and do so for three reasons. First, [HN16](#)<sup>[↑]</sup> the primary consideration as to whether [section 21166](#) applies is whether “the previous environmental document retains any relevance in [\*\*\*22] light [\*582] of the proposed changes ... .” (*San Mateo Gardens, supra, 1 Cal.5th at p. 944*; cf. *Sierra Club v. County of Sonoma (1992) 6 Cal.App.4th 1307, 1320–1321 [8 Cal. Rptr. 2d 473]* [new development-level project would develop agricultural lands exempted from development (and thus not studied) under the prior, program-level environmental impact report; [§ 21166](#) inapplicable].) That consideration looks to the continued relevance of the information provided by the prior [CEQA](#) analysis, not the type of project for which it was generated. Second, courts have more generally declined to “attach[] too much significance” to the ““semantic label”” a project bears. (*Citizens for a Sustainable Treasure Island v. City and County of San Francisco (2014) 227 Cal.App.4th 1036, 1048 [174 Cal. Rptr. 3d 363]* [“the ‘fact that this [environmental impact report] is labeled a “project” rather than a “program” [report] matters little ...’ for purposes of its sufficiency as an informative document”]; see *Cal. Code Regs., tit. 14, § 15160* [granting agencies discretion how to classify environmental impact reports—as between program- and development-level].) Lastly, placing definitive weight on the label would lead to an absurd result. If the City had enacted the Ordinance first (and, consistent with [CEQA](#), studied its environmental effects, which would at a minimum have studied the effects of building the Superstore), there is little doubt that section 21166 would govern whether [\*\*328] the City needed a further report if there was [\*\*\*23] a subsequent change to the Superstore project; we see no reason why the result should be any different just because the Superstore's [CEQA](#) review came first. In both scenarios, section 21166 applies because the prior [CEQA](#) analysis “retains ... relevance in light of the proposed changes ... .” (*San Mateo Gardens, at p.*

[944.](#))

[CA\(14\)](#)<sup>[↑]</sup> (14) As discussed below, the dispute in this case centers on how the City should have examined the environmental impact arising from Subarea F's potential to encourage further large commercial developments. By definition, the environmental impact of the Superstore as a large commercial development placed in Subarea F is part of that analysis. As a result, the prior environmental impact report that studied the Superstore “retains ... relevance.” (*San Mateo Gardens, supra, 1 Cal.5th at p. 944.*) Indeed, the [CEQA](#) guidelines themselves specify that [HN17](#)<sup>[↑]</sup> projects that could be categorized either as a change to a general or specific plan or as the approval of a specific development be evaluated under [CEQA](#) as a specific development (*Cal. Code Regs., tit. 14, § 15378, subd. (d)*; *Christward Ministry v. Superior Court (1986) 184 Cal.App.3d 180, 195–196 [228 Cal. Rptr. 868]* (*Christward Ministry*)), which reinforces the propriety of evaluating the Ordinance—which operates at both a program and development level—by reference to the development, including prior analyses of that development.

[CA\(15\)](#)<sup>[↑]</sup> (15) Plaintiffs [\*\*\*24] suggest that it may be inappropriate to rely upon the previously prepared environmental impact report for the Superstore because, [\*583] in their view, that report is defective. However, [HN18](#)<sup>[↑]</sup> the accuracy of the information in the prior [CEQA](#) analysis does not affect its relevance under [section 21166](#). (*Melom, supra, 183 Cal.App.4th at p. 49 [§ 21166* applies “even if the initial review is discovered to have been inaccurate and misleading in the description of a significant effect or the severity of its consequences”].) What is more, plaintiffs challenged the prior report, and the trial court rejected their challenges. The trial court's final judgment affirming the validity of the prior [CEQA](#) analysis that was left intact after the *La Mirada I* appeal is now final and cannot now be collaterally attacked. ([HN19](#)<sup>[↑]</sup> *Kabran v. Sharp Memorial Hospital (2017) 2 Cal.5th 330, 339 [212*

[Cal. Rptr. 3d 361, 386 P.3d 1159](#)[CA\(16\)](#)[\[↑\]](#) (16) [“collateral attack on a final judgment” is only permissible where the prior judgment is “void because of an absence of “fundamental jurisdiction””]).

For these reasons, we will examine the propriety of the City's conduct under [section 21166](#).

### C. Did the City comply with [section 21166](#)?

#### 1. What is the standard for further environmental review under [section 21166](#)?

##### a. When do changes or new information require major revisions to a prior [CEQA](#) analysis?

[CA\(17\)](#)[\[↑\]](#) (17) As explained above, [HN20](#)[\[↑\]](#) [section 21166](#) provides that, where an [\[\\*\\*\\*25\]](#) agency has engaged in a prior [CEQA](#) review that retains relevance to the project currently under consideration, the agency must file an addendum (either to a prior environmental impact report or prior negative declaration) *unless* (1) there have been “[s]ubstantial changes” in either the project or the circumstances “under which the project is being undertaken” “which will require major revisions” of the prior environmental impact report or negative declaration, or (2) there is “[n]ew information” that was “not known and could [\[\\*\\*329\]](#) not have been known” at the time of the prior [CEQA](#) review. ([§ 21166](#).) If these conditions exist, the agency must prepare a “subsequent or supplemental” report. (*Ibid.*)

[CA\(18\)](#)[\[↑\]](#) (18) [CEQA](#) itself provides no further guidance on what these standards mean, but the “Guidelines” interpreting [CEQA](#) do. Those Guidelines indicate that “major revisions” to a [CEQA](#) review document will be required, and that “[n]ew information” will warrant a new document, when the project currently under consideration “involve[s] ... new significant environmental effects or a substantial increase in the severity of previously identified significant effects” or the “[n]ew information” shows the same. ([Cal. Code Regs., tit. 14, § 15162, \[\\*\\*584\] subd. \(a\).](#)) [HN21](#)[\[↑\]](#)

] This inquiry into whether a prior [CEQA](#) review [\[\\*\\*\\*26\]](#) of a project is sufficient in scope vis-à-vis subsequent changes to that project is, in our view, functionally indistinguishable from the question whether a current [CEQA](#) review of a project is sufficient in scope vis-à-vis possible future actions flowing from that project. In both instances, the fundamental question is the same: Does the existing [CEQA](#) document encapsulate all of the environmentally significant impacts of the project? In the latter instance, further [CEQA](#) analysis is required only (1) if the “future expansion or other action ... is a reasonably foreseeable consequence of the initial project,” and (2) if that “future expansion or action will be significant in that it will likely change the scope or nature of the initial project or its environmental effects.” ([Laurel Heights Improvement Assn. v. Regents of University of California \(1988\) 47 Cal.3d 376, 396 \[253 Cal.Rptr. 426, 764 P.2d 278\]](#) (*Laurel Heights*.) We hold that the same test should be applied in both instances, including under [section 21166](#).

##### b. When is a consequence reasonably foreseeable?

[HN22](#)[\[↑\]](#) [CA\(19\)](#)[\[↑\]](#) (19) The inquiry into whether a consequence of a project is reasonably foreseeable (and thus requires further [CEQA](#) review) depends on how broadly [CEQA](#) construes the concept of reasonable foreseeability. Although that concept could be defined very broadly (because, as courts [\[\\*\\*\\*27\]](#) have noted in other contexts, on a “clear judicial day[,] ... a court can foresee forever” ([Thing v. La Chusa \(1989\) 48 Cal.3d 644, 668 \[257 Cal. Rptr. 865, 771 P.2d 814\]](#))), the courts have taken a more Goldilocks-esque approach when defining the concept of reasonable foreseeability under [CEQA](#).

On the one hand, construing reasonable foreseeability too narrowly means that a consequence may not be evaluated until it is “too late.” This is problematic because the failure to consider a consequence (1) can violate [CEQA](#)'s mandate that agencies consider the cumulative and

total effect of a project rather than “chopping a large project into many little ones[,] each with a minimal potential impact on the environment” (*Bozung v. Local Agency Formation Com. (1975)* [13 Cal.3d 263, 283–284 \[118 Cal. Rptr. 249, 529 P.2d 1017\]](#) (*Bozung*); see *Cal. Code Regs., tit. 14, § 15378, subd. (a)* [defining “project” as “the whole of an action”]; (2) risks that the agency will not consider that consequence until after the project has been approved, at which point the “steamroller effect of development” makes it nearly impossible to deflect the “momentum” for that project (*Environmental Council of Sacramento v. City of Sacramento (2006)* [142 Cal.App.4th 1018, 1031 \[48 Cal. Rptr. 3d 544\]](#) (*Environmental Council*)); and (3) risks that the agency will have already otherwise made up its mind, rendering any study of the consequence little more than “a burdensome reconsideration of decisions already made” or a ““*post hoc* rationalization[] [\*\*\*330] to support action [\*\*\*28] already [\*585] taken ...” ... .’ [Citation.]” (*Banning Ranch Conservancy v. City of Newport Beach (2012)* [211 Cal.App.4th 1209, 1221, 1222 \[150 Cal. Rptr. 3d 591\]](#) (*Banning Ranch*); see *Laurel Heights, supra*, [47 Cal.3d at pp. 394–395](#)). (Accord, *Cal. Code Regs., tit. 14, § 15004, subd. (b)* [environmental impact reports “should be prepared as early as feasible in the planning process to enable environmental considerations to influence project[,] program[,] and design”].)

On the other hand, construing reasonable foreseeability too broadly means that a consequence may be evaluated “too early.” This is problematic because ““where future development is unspecified and uncertain, no purpose can be served by requiring an [agency] to engage in sheer speculation as to future environmental consequences.”” (*Laurel Heights, supra*, [47 Cal.3d at p. 395](#), quoting *Lake County Energy Council v. County of Lake (1977)* [70 Cal.App.3d 851, 854–855 \[139 Cal. Rptr. 176\]](#) (*Lake County*); *Environmental Council, supra*, [142 Cal.App.4th at pp. 1031–1032](#).) Such “premature environmental analysis,” our Supreme Court has held, is both “meaningless

and financially wasteful.” (*Laurel Heights, at p. 396*.)

i. *When it is*

[CA\(20\)\[↑\]](#) (20) In trying to balance these competing concerns and to fashion a definition that is “just right” for [CEQA](#), [HN23\[↑\]](#) courts have deemed a consequence of a project to be reasonably foreseeable only when that consequence is, as a practical matter, sufficiently certain to happen. (Accord, *Laurel Heights, supra*, [47 Cal.3d at p. 398 \[CEQA “do\[es\] not require prophecy”\]](#).) The degree of certainty has been found to be sufficient in five different situations.

First, a consequence is reasonably foreseeable [\*\*\*29] when the agency has already committed itself to undertake the consequence. (*Cal. Code Regs., tit. 14, § 15165 [CEQA review required where the responsible “agency” “commits ... to” the consequence]*.)

Second, a consequence is reasonably foreseeable when the project under review presupposes the occurrence of that consequence—that is, when the consequence is a “necessary” and essential component of the project itself. (*Banning Ranch, supra*, [211 Cal.App.4th at p. 1223](#) [review of consequence required when “reviewed project legally compels or practically presumes completion” of that consequence]; see, e.g., *Santiago County Water Dist. v. County of Orange (1981)* [118 Cal.App.3d 818, 829–830 \[173 Cal. Rptr. 602\]](#) [agency, when evaluating sand and gravel mining project, must also analyze water delivery system necessary for operation of the mining project]; *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus (1994)* [27 \[\\*\\*\\*586\] Cal.App.4th 713, 729–732 \[32 Cal. Rptr. 2d 704\]](#) [agency, when evaluating residential development, must also analyze the sewer expansion necessary for that development].)

Third, a consequence is reasonably foreseeable when it is itself under environmental review. (*City of Santee v. County of San Diego (1989)* [214](#)

[Cal.App.3d 1438, 1452 \[263 Cal. Rptr. 340\]](#) (*City of Santee*) [“[r]elated projects currently under environmental review unequivocally qualify as probable future” consequences “to be considered”]; [San Franciscans for Reasonable Growth v. City and County of San Francisco \(1984\) 151 Cal.App.3d 61, 75 \[198 Cal. Rptr. 634\]](#) [“experience and common sense indicate that projects which are under review are ‘reasonabl[y] foreseeable [\*\*331] future projects”]; see, e.g., [Tuolumne County Citizens for Responsible Growth, Inc. v. City of Sonora \(2007\) 155 Cal.App.4th 1214, 1218–1224 \[66 Cal. Rptr. 3d 645\]](#) [agency, when evaluating construction [\*\*\*30] of home improvement center, must also examine road realignment consequence that it approved to effectuate (and was a condition of) the home improvement center]; [Friends of the Eel River v. Sonoma County Water Agency \(2003\) 108 Cal.App.4th 859, 869 \[134 Cal. Rptr. 2d 322\]](#) [agency should consider consequence that was, at the time of the agency's review, being reviewed by a federal agency].)

Fourth, a consequence is reasonably foreseeable when the agency subjectively “intends” or anticipates the consequence, and the project under review is meant to be the “first step” toward that consequence. ([Bozung, supra, 13 Cal.3d at p. 284](#); [Laurel Heights, supra, 47 Cal.3d at p. 396](#); [Banning Ranch, supra, 211 Cal.App.4th at pp. 1222–1223](#); see, e.g., [City of Carmel-by-the-Sea v. Board of Supervisors \(1986\) 183 Cal.App.3d 229, 243–244 \[227 Cal. Rptr. 899\]](#) [agency, when evaluating rezoning ordinance, should have also examined an anticipated development project for which rezoning was the “first step”]; [Bozung, at p. 281](#) [agency, when evaluating annexation of land, should have also examined housing development that was “the impetus for the ... annexation”]; [City of Santee, supra, 214 Cal.App.3d at p. 1454](#) [agency, when evaluating temporary use of interim detention center for seven years, should have also examined the indefinite use in light of evidence that the use may be more permanent]; [Laurel Heights, at p. 398](#) [agency, when evaluating lease of

100,000 square feet of a building, should have also examined lease of remaining square footage that would soon become available for lease]; [Fullerton Joint Union High School Dist. v. State Bd. of Education \(1982\) 32 Cal.3d 779, 797 \[187 Cal. Rptr. 398, 654 P.2d 168\]](#) [agency, when evaluating secession from [\*\*\*31] existing school district, should have also examined construction of new high school for which succession was “an essential step”]; cf. [Kings County Farm Bureau v. City of Hanford \(1990\) 221 Cal.App.3d 692, 738–739 \[270 Cal. Rptr. 650\]](#) [agency, when evaluating use [\*587] of facility for 20 years, need not examine further use absent “credible and substantial evidence” of use beyond 20 years].)

Lastly, a consequence is reasonably foreseeable if the project under review creates an incentive that is all but certain to result in the consequence. (See, e.g., [City of Antioch v. City Council \(1986\) 187 Cal.App.3d 1325, 1335–1338 \[232 Cal. Rptr. 507\]](#) [agency, when evaluating construction of road and sewers, should also consider future residential development because “the sole reason to construct the road and sewer project is to provide a catalyst for further development in the immediate area”]; [Napa Citizens for Honest Government v. Napa County Bd. of Supervisors \(2001\) 91 Cal.App.4th 342, 352–353, 367–370 \[110 Cal. Rptr. 2d 579\]](#) (*Napa Citizens*) [agency, when evaluating industrial park development, should also examine the residential development that will be necessary to fill the new jobs created by the businesses using the industrial park]; [California Unions for Reliable Energy v. Mojave Desert Air Quality Management Dist. \(2009\) 178 Cal.App.4th 1225, 1244–1246 \[101 Cal. Rptr. 3d 81\]](#) [agency, when evaluating new rule allowing for paving of roads in the desert, should also examine effect of paving projects when the agency “intended at least some actual road [\*\*\*332] paving to occur”]; [Terminal Plaza Corp. v. City and County of San Francisco \(1986\) 177 Cal.App.3d 892, 904–905 \[223 Cal. Rptr. 379\]](#) (*Terminal Plaza*) [\*\*\*333] [agency, when evaluating zoning amendment that would require residential [\*\*\*32] hotel owners to relocate tenants

if the owners convert their property to other uses, should also examine the construction impacts necessary to relocate displaced tenants because those impacts are “undeniable”).

[HN24](#)<sup>[↑]</sup> [CA\(21\)](#)<sup>[↑]</sup> (21) If a consequence falls into any of these categories and is sufficiently certain to come to pass that it warrants evaluation under [CEQA](#), it does not matter that the consequence might be subject to later [CEQA](#) review when its contours become more concrete. ([Bozung, supra, 13 Cal.3d at p. 282.](#)) Nor does it matter that the consequence's contours are hazy and thus its impact “cannot be gauged with exactitude.” ([Terminal Plaza, supra, 177 Cal.App.3d at pp. 904–905](#); see [Cal. Code Regs., tit. 14, § 15151](#) [agencies should proceed “in the light of what is reasonably feasible” information]; [Napa Citizens, supra, 91 Cal.App.4th at p. 367](#) [“great detail” not required when analyzing future consequence]; see [Stanislaus Audubon Society, Inc. v. County of Stanislaus \(1995\) 33 Cal.App.4th 144, 158 \[39 Cal. Rptr. 2d 54\]](#) (*Stanislaus Audubon Society*) [“The fact that the exact extent and location of such growth cannot now be determined does not excuse the [agency] from preparation of an [environmental impact report]”).

ii. *When it is not*

[CA\(22\)](#)<sup>[↑]</sup> (22) Conversely, [HN25](#)<sup>[↑]</sup> a consequence is not reasonably foreseeable when it is entirely independent of the project under consideration. ([Banning Ranch, \[\\*588\] supra, 211 Cal.App.4th at p. 1223](#) [“two projects may properly undergo separate environmental review ... when the projects have different proponents, [\*\*\*33] serve different purposes, or can be implemented independently”]; see, e.g., [Christward Ministry v. County of San Diego \(1993\) 13 Cal.App.4th 31, 42–44 \[16 Cal. Rptr. 2d 435\]](#) [agency, when considering expansion of landfill, need not consider “independent” landfill projects]; [City of Richmond, supra, 184 Cal.App.4th at pp. 75–76, 100–101](#) [agency, when considering expansion to refinery's gasoline output, need not consider expansion to refinery's hydrogen pipeline because the two “are

not interdependent”].)

A consequence is not reasonably foreseeable simply because the project under consideration makes that consequence a *possibility*—even when the public agency is subjectively aware of that possibility (that is, even when it is “a gleam in [the] planner's eye” ([Laurel Heights, supra, 47 Cal.3d at p. 398](#); see, e.g., [Pala Band of Mission Indians v. County of San Diego \(1998\) 68 Cal.App.4th 556, 575–576 \[80 Cal. Rptr. 2d 294\]](#) [agency, when adopting waste management plan, need not evaluate impact of future landfills just because plan identifies 10 tentative landfill sites, when there is no evidence any site will be developed]; [National Parks & Conservation Assn. v. County of Riverside \(1996\) 42 Cal.App.4th 1505, 1518–1519 \[50 Cal. Rptr. 2d 339\]](#) [agency, when evaluating a landfill project, need not evaluate possible pre-dumping processing facilities because it is unknown whether they will be built inside agency's jurisdiction]; [Lake County, supra, 70 Cal.App.3d at pp. 855–856](#) [agency, when evaluating exploratory drilling, need not evaluate commercial drilling that will follow because it is unknown whether site being explored will be favorable]; [Towards Responsibility in Planning v. City Council \(1988\) 200 Cal.App.3d 671, 680–681 \[246 Cal. Rptr. 317\]](#) [agency, when [\*\*\*34] evaluating rezoning project, need not evaluate impact of new sewage treatment plant when the project only makes the need for such a plant possible]; [Save Round Valley Alliance v. County of Inyo \(2007\) 157 Cal.App.4th 1437, 1450–1451 \[70 Cal. Rptr. 3d 59\]](#) (*Save Round Valley*) [agency, when evaluating residential development project, need not evaluate impact of future owners' decision to build second units on each lot because, while possible, there is no evidence this will occur]; [Topanga Beach Renters Assn. v. Department of General Services \(1976\) 58 Cal.App.3d 188, 195–196 \[129 Cal. Rptr. 739\]](#) (*Topanga Beach Renters*) [agency, when considering project to restore beach to natural state, need not consider impact of future residential development on nearby properties that might seek to capitalize on pristine beach absent any

“evidence” such development will occur]; *Berkeley Keep Jets Over the Bay Com. v. Board of Port Cmrs.* (2001) 91 Cal.App.4th 1344, 1362 [111 Cal. Rptr. 2d 598] [agency, when evaluating airport development plan, need not consider expanded runway capacity that is merely possible]; *Friends of the Sierra Railroad v. Tuolumne Park & Recreation Dist.* (2007) 147 Cal.App.4th 643, 647, 651 [54 Cal. Rptr. 3d 500] [agency, when [\*589] considering transfer of railroad right-of-way, need not consider development of surrounding property that is possible when nature of that development is unknown]; *Kaufman & Broad-South Bay, Inc. v. Morgan Hill Unified School Dist.* (1992) 9 Cal.App.4th 464, 470–475 [11 Cal. Rptr. 2d 792] [agency, when adopting taxation district to finance future schools, need not consider impact of building those schools where adoption of district will not create need to do so]). Indeed, it is not enough to show that the consequence is a probability [\*\*\*35]. (*Brentwood Assn. for No Drilling, Inc. v. City of Los Angeles* (1982) 134 Cal.App.3d 491, 502 [184 Cal. Rptr. 664] [agency, when examining exploratory drilling, need not consider subsequent commercial drilling when results of exploratory drilling are unknown, even though exploratory drilling reveals favorable sites for commercial drilling 55 percent of the time].)

And, more to the point here, a consequence is not reasonably foreseeable merely because the project creates an incentive for that consequence to come to pass (unless, as noted above, that incentive makes the consequence all but certain). (See *Aptos Council v. County of Santa Cruz* (2017) 10 Cal.App.5th 266, 274–275, 294–295 [216 Cal. Rptr. 3d 142] [agency, when considering ordinance changing zoning rules regarding permissible hotel density, need not consider impact of future developments—even though new rules create incentive for future development—because “it is unclear whether the ordinance will in fact induce future development”].)

In these situations, *CEQA* does not exempt the consequence from environmental review; it merely

postpones that review until the consequence is sufficiently certain. (See *Lake County, supra*, 70 Cal.App.3d at pp. 856–857 [so noting].)

2. Does substantial evidence support the City Council's finding that no further environmental review is warranted under *section 21166*?

Because we are applying *section 21166*, our task is not to assess for ourselves whether there is a fair argument that a [\*\*\*36] particular consequence is reasonably foreseeable. (See *Stanislaus Audubon Society, supra*, 33 Cal.App.4th at pp. 152–159.) Instead, as we discuss above, our task is to assess whether substantial evidence supports the City Council's finding that no large-scale commercial developments beyond the Superstore [\*\*\*334] are a reasonably foreseeable consequence of the SNAP Amendment's creation of Subarea F (which, in turn, means that there is no need for major revisions in the previously promulgated environmental impact report for the Superstore, and that the City Council's use of an addendum complies with *CEQA*).

*HN26*[↑] Substantial evidence is defined as “evidence”—that is, as the “facts, reasonable assumptions predicated upon facts, and expert opinion supported [\*590] by facts”—presented in the record. (§ 21082.2, *subd. (c)*; see *Wal-Mart Stores, Inc. v. City of Turlock* (2006) 138 Cal.App.4th 273, 291 [41 Cal. Rptr. 3d 420] (*Wal-Mart*); *Save Round Valley, supra*, 157 Cal.App.4th at pp. 1450–1451; *Topanga Beach Renters, supra*, 58 Cal.App.3d at pp. 195–196.) Substantial evidence does not include “[a]rgument, speculation, unsubstantiated opinion or narrative.” (§ 21082.2, *subd. (c)*.) In assessing whether substantial evidence supports an agency's finding, we must “indulge all reasonable inferences from the evidence that would support the agency's” finding as well as “resolve all conflicts in the evidence” and “all reasonable” doubts “in favor of” that finding. (*Mani Brothers, supra*, 153 Cal.App.4th at p. 1397; *Citizens for a Megaplex-Free Alameda, supra*, 149 Cal.App.4th at p. 112.)

[CA\(23\)](#)<sup>[↑]</sup> (23) Substantial evidence supports the City Council's finding that the sole reasonably [\*\*\*37] foreseeable consequence of creating Subarea F was the construction of the Superstore. The evidence in the administrative record indicates that the City Council has not committed itself to any modification of the currently existing commercial development on the two other parcels currently meeting Subarea F's size and proximity-to-transit requirements; that such modification is neither essential nor necessary to the creation of Subarea F; that no such modification is currently under review; that no such modification is either "intended" or "anticipated"; and that the creation of Subarea F does not create an incentive that makes modification of the existing commercial development all but certain (either on the two potential existing parcels or on other parcels that might be "cobbled together").

[Christward Ministry, supra, 184 Cal.App.3d 180](#) is directly on point. There, the agency amended its community-wide land use plan to allow for the designation of landfills, but only designated a single landfill. [\*\*\*38] The agency's environmental impact report examined the environmental impacts of the designated landfill, but not any of the other possible sites that could be—but were not—designated. This complied with [CEQA](#). ([Christward Ministry, at p. 189.](#)) This case is no different: The City created a new subzone and rezoned only one development into that subzone; updating its prior report analyzing that development also complies with [CEQA](#).

The trial court held that [section 21166](#) did not apply because the City Council's amendment of the SNAP altered the method by which the Superstore was approved (that is, by amending the SNAP rather than granting variances from it), and thus constituted a substantial change "with respect to the *circumstances* under which [the Superstore] is being undertaken," thereby [\*591] falling into one of [section 21166](#)'s exceptions. ([§ 21166, subd. \(b\)](#), italics added.) This analysis is incorrect because it ignores that the exception for [\*\*335] changed

circumstances by its terms only applies when that change "will require major revisions in the" agency's [CEQA](#) analysis ([§ 21166, subd. \(b\)](#)); a change in circumstances, by itself, is not enough. As explained above, major revisions are required only when the change creates reasonably foreseeable consequences that are not addressed by prior [\*\*\*39] [CEQA](#) review; and here, there are no such consequences.

Plaintiffs make four arguments as to why the creation of Subarea F necessitates further [CEQA](#) review beyond an addendum.

First, Citizens Coalition asserts that the Addendum does not discuss the creation of Subarea F. This is factually incorrect, as the Addendum defines the "Revised Project" it assesses as including both the creation of Subarea F *and* the completion of the Superstore.

Second, plaintiffs argue that the City *intended* further Subarea F developments beyond Target, as proven by (1) the amended SNAP's use of the plural (rather than the singular) in setting forth the requirements of new Subarea F, and (2) language in a report by the Los Angeles Department of City Planning, which states that "amending the SNAP to reclassify the [Superstore] in the new Subarea F ... recognizes that the nature of 'superstore' retail is changing" and that "there need to be new regulations in place" "for the SNAP to appropriately capture this new development typology and the jobs and economic development that come with it." The City's use of the plural versus the singular is part and parcel of setting forth new eligibility criteria and in no way [\*\*\*40] calls into question the City's finding that development beyond the Superstore is not reasonably foreseeable. (Accord, [Larsen v. San Francisco \(1920\) 182 Cal. 1, 10 \[186 P. 757\]](#) [noting that ordinance's use of the plural is of no consequence where, as here, "the context does not limit the meaning"].) And the language in the report explains why amending the SNAP was necessary to effectuate the Superstore project as well as to spell

out the eligibility criteria for Subarea F. When considered in conjunction with the other evidence that the sole Subarea F project was the Superstore and that no other projects were being contemplated, substantial evidence still supports the City's finding that development beyond the Superstore is not reasonably foreseeable.

Third, plaintiffs argue that the creation of Subarea F creates incentives for retailers to build large retail projects in either (i) the other two parcels within the SNAP meeting Subarea F's size and proximity-to-transit requirements, or (ii) in new parcels meeting those requirements that can be cobbled together from smaller parcels. Plaintiffs effectively rely on the precursor principle to [\*592] *Field of Dreams's* “if you build it, they will come”—namely, “if you zone it, they will build.” We need not [\*\*\*41] independently delve into whether Subarea F's requirements create a powerful incentive to build (given that those requirements also obligate retailers to build pedestrian-focused facilities and space for other retailers) because, as we explain in detail above, the City Council had substantial evidence upon which to conclude that any incentives created by Subarea F do not make development all but certain.

Lastly, plaintiffs ask us to abandon substantial evidence review in favor of independent review because ordinances (like the SNAP Amendment) are to be construed *de novo*. While courts independently interpret the meaning of statutes (of which ordinances are obviously a subspecies) (*Meyers v. Board of Administration etc.* (2014) 224 Cal.App.4th 250, 256 [168 Cal. Rptr. 3d 560]), we are not interpreting the *meaning* of the SNAP Amendment, [\*\*336] but rather its *environmental impact*; the question of impact is, under [section 21166](#), evaluated for substantial evidence.

## II. Is There Impermissible Spot Zoning?

Plaintiffs argue in the alternative that the Ordinance constitutes impermissible spot zoning by putting the Superstore—but not other parcels—into the less restrictively zoned Subarea F.

[HN27](#) [CA\(24\)](#) (24) “Spot zoning” occurs when a parcel of land is rezoned to give it fewer or greater rights than the parcels surrounding it. (*Foothill Communities, supra*, 222 Cal.App.4th at pp. 1307, 1311–1312; *Arcadia Development Co. v. City of Morgan Hill* (2011) 197 Cal.App.4th 1526, 1536 [129 Cal. Rptr. 3d 369] (*Arcadia Development*).) [\*\*\*42] Although spot zoning traditionally refers to the creation of “islands” with *more restrictive* zoning (e.g., *Wilkins v. City of San Bernardino* (1946) 29 Cal.2d 332, 340 [175 P.2d 542] (*Wilkins*); *Hamer v. Town of Ross* (1963) 59 Cal.2d 776, 781–782 [31 Cal.Rptr. 335, 382 P.2d 375]; *Avenida San Juan Partnership v. City of San Clemente* (2011) 201 Cal.App.4th 1256, 1268–1269 [135 Cal. Rptr. 3d 570] (*Avenida San Juan*), it can also refer to the creation of “islands” with *less restrictive* zoning (*Foothill Communities, at pp. 1307, 1311–1314*). Because local bodies enjoy broad legislative discretion when it comes to zoning (*id. at pp. 1309–1310*; *Wilkins, at pp. 337–338*), however, spot zoning is not necessarily invalid. (*Foothill Communities, at p. 1314* [“spot zoning may or may not be impermissible, depending on the circumstances”].) The burden is on the party challenging the spot zoning to show that the spot zoning was invalid and hence an abuse of that discretion. (*Foothill Communities, at p. 1309*; *Wilkins, at pp. 338–339*.)

The creation of a “spot zone” is invalid only when it is not in the public interest—that is, when it is “arbitrary,” “irrational,” and “unreasonable.” [\*593] (*Foothill Communities, supra*, 222 Cal.App.4th at pp. 1309, 1314; *Wilkins, supra*, 29 Cal.2d at p. 339; *Avenida San Juan, supra*, 201 Cal.App.4th at pp. 1268–1269). A spot zone is in the public interest as long as “there is a reasonable basis for the belief that the [spot zone] has substantial relation to the public health, safety, morals or general welfare.” (*Wilkins, at p. 339*; *Arcadia Development, supra*, 197 Cal.App.4th at p. 1536 [spot zone valid if any “rational reason in the public benefit exists for such a classification”].) And, if the spot zone is part of a specific plan, the spot zone must also—like *all* parts of a specific

plan—be “compatible” with the general plan of which the [\*\*\*43] specific plan is a part. (Gov. Code, §§ 65454 [“No specific plan may be adopted or amended unless [it] is consistent with the general plan”], 66473.5 [same].) A specific plan is compatible if it is ““in agreement or harmony with” the terms of the applicable [general] plan, not in rigid conformity with every detail thereof.” (*San Franciscans Upholding the Downtown Plan v. City and County of San Francisco* (2002) 102 Cal.App.4th 656, 678 [125 Cal. Rptr. 2d 745].)

Plaintiffs have not carried their burden of showing that the City Council engaged in impermissible spot zoning. At the outset, it is unclear whether Subarea F amounts to less restrictive zoning because it imposes many special requirements upon developments within its confines; it is somewhat of a mixed bag.

But even if we assume that Subarea F is on the whole less restrictive, and [\*\*337] that the creation of Subarea F for just the Superstore consequently amounts to spot zoning, it is not impermissible. To begin, there is a “reasonable basis” for the City Council’s “belief” that the creation of Subarea F “has substantial relation to the public health, safety, morals or general welfare.” (*Wilkins, supra, 29 Cal.2d at p. 339.*) The City’s staff exhaustively documented why building a Superstore as part of a complex with smaller retail spaces and a pedestrian plaza near subway and freeway access is in the public interest: [\*\*\*44] Among other reasons, the development will “provide a much needed, convenient, high quality retail shopping center that will serve the existing community in a location that contains under-utilized commercial uses,” will “provide excellent access for goods movement with a minimum disruption to adjacent residential and lower intensity neighborhoods,” and will “provid[e] attractive public streetscapes” by requiring the developer to widen the surrounding sidewalks, plant trees, and install bike racks and benches. Further, and as the Addendum explains and as the City’s staff also exhaustively documented, the

Ordinance (as a SNAP amendment) is “compatible” with the City’s General Plan, the Hollywood Community Plan, and the SNAP itself because Subarea F provides for development that is “urban scaled, pedestrian friendly, [and] transit oriented.” [\*\*594]

Rather than attack the specific findings of the City’s staff as to how the Ordinance is in the public interest and is compatible with the other applicable plans, plaintiffs make what amount to five other challenges.

First, they contend that the City never made a finding that the Ordinance was in the public interest. We reject this argument. The law requires a “reasonable [\*\*\*45] basis” for such a finding (*Wilkins, supra, 29 Cal.2d at p. 339*), not an express finding. What is more, and as detailed above, the City’s staff *did* make such a finding and, more to the point, explained its basis for that finding.

CA(25)[↑] (25) Second, plaintiffs assert that the Ordinance is not in the public interest because it was enacted to legitimize what the trial court previously held was an invalid project and to “allow[] Target to benefit from its arrogant ... construction of the Project during the pendency of litigation.” However, HN28[↑] the City Council’s *motive* for enacting the Ordinance is irrelevant because “the validity of legislative acts must be measured by the terms of the legislation itself, and not by the motives of, or [the] influences upon, the legislators who enacted the measure.” (*City and County of San Francisco v. Cooper* (1975) 13 Cal.3d 898, 913 [120 Cal. Rptr. 707, 534 P.2d 403]; see *Wal-Mart, supra, 138 Cal.App.4th at p. 302.*)

Third, plaintiffs argue that the City staff’s findings regarding public benefit are “boilerplate” (and thus presumably entitled to no weight), that the Superstore complex confers no greater benefits than the original store Target originally proposed to build, and that the sole beneficiary of the Ordinance is Target. By these arguments, plaintiffs ask us to

second-guess the City Council's assessment of what is in the public interest. We [\*\*\*46] must decline this request because “‘the wisdom or good policy of a zoning ordinance is for a municipality to determine and the courts have nothing to do with it.’ [Citations.]” (*Tandy v. City of Oakland (1962) 208 Cal.App.2d 609, 612 [25 Cal. Rptr. 429]*; *Fund for Environmental Defense, supra, 204 Cal.App.3d at p. 1545* [“it is not our task to judge the wisdom of the [agency's] action”].)

[\*\*338] Fourth, plaintiffs suggest that the reasons that justify placing the Superstore in Subarea F would justify—if not compel—the development of other large-scale commercial projects, which taken as a whole is not in the public interest. This suggestion overlooks the fundamental rationale of the law underlying spot zoning. “The essence of spot zoning,” like the essence of equal protection, “is irrational discrimination.” (*Avenida San Juan, supra, 201 Cal.App.4th at p. 1268* [spot zoning]; see *Gerawan Farming, Inc. v. Agricultural Labor Relations Bd. (2017) 3 Cal.5th 1118, 1142–1143 [225 Cal. Rptr. 3d 517, 405 P.3d 1087]* [equal protection].) The law of equal protection recognizes that legislatures may lawfully proceed by taking one [\*595] step at a time. (*Kasler v. Lockyer (2000) 23 Cal.4th 472, 488 [97 Cal. Rptr. 2d 334, 2 P.3d 581]*.) The same is true for spot zoning. The City Council retains the power to assess whether future large-scale commercial developments are in the public interest; nothing in the Ordinance robs the City Council of that power.

[CA\(26\)](#)<sup>[↑]</sup> (26) Lastly, plaintiffs intimate that the Ordinance is incompatible with the SNAP because it alters it. The plain import of this argument is that a SNAP may never be [\*\*\*47] amended. [HN29](#)<sup>[↑]</sup> ] That is clearly not the law. (Gov. Code, §§ 65453, 65454; *Foothill Communities, supra, 222 Cal.App.4th at p. 1310* [“The approval of a specific plan does not create a vested right to develop property in a manner consistent with the specific plan, or to prevent development inconsistent with it”].)

## DISPOSITION

The judgment is reversed. Target and the City are entitled to their costs on appeal.

Ashmann-Gerst, Acting P. J., and Chavez, J., concurred.
